

discretion may give credit, not in excess of one year, for satisfactory graduate study in engineering); and the successful completion of an eight-hour written examination in the fundamentals of engineering and of an eight-hour written examination in the principles and practice of engineering. A person who has successfully completed the examination in the fundamentals of engineering as an engineer-in-training shall be considered to have successfully completed the examination in the fundamentals of engineering required by this section. Where the evidence presented in and with the application does not appear to the Board to warrant the admission to the examination, the applicant may be required to present further evidence for the consideration of the Board; or

(2) Graduation from an engineering curriculum of four scholastic years or more or their equivalent other than the ones approved by the Board; eight years or more of additional experience in engineering work of a character satisfactory to the Board and which indicates to the Board that the applicant may be competent to practice engineering; and the successful completion of an eight-hour written examination in the fundamentals of engineering designed to show knowledge and skill equivalent to that obtained through graduation from an approved four-year engineering curriculum and of an eight-hour written examination in the principles and practice of engineering. Where the evidence presented in and with the application does not appear to the Board to warrant the admission to the examination, the applicant may be required to present further evidence for the consideration of the Board; or

(3) A specific record of at least twelve years of engineering work of a character satisfactory to the Board, of which at least five years have been in responsible charge, and indicating that the applicant may be competent to practice engineering; provided, however, that the evidence of such practice presented by the applicant is satisfactory to the Board, and that the applicant successfully completes an eight-hour written examination in the principles and practice of engineering. Where the evidence presented in and with the application does not appear to the Board to warrant the admission to the examination, the applicant may be required to present further evidence for the consideration of the Board.

[(b)](C) As an engineer-in-training:

(1) Graduation from an engineering curriculum of four scholastic years or more approved by the Board and the successful completion of an eight-hour written
