RESOLVED, That the Department of Natural Resources is designated the Task Force Coordinator and the membership of the Task Force shall include but not be limited to, [[appropriate representation]] two official representatives from the following groups: the Department of Natural Resources; the Department of Health and Mental Hygiene; the Department of Education; the Department of Human Resources, including at least one representative from the State Manpower Planning Office, the Employment Security Administration, and the Social Services Administration; the Department of State Planning; the Department of Agriculture; representative private employers of environmental manpower; and selected county and municipal governments which are broadly representative of employment and environmental needs in the various geographical regions of the State; and be it further

RESOLVED, That the Task Force shall prepare a written report, and in the development of this report, shall give attention to the following concerns:

1. Determining how many citizens, ages 18 to 24 are unemployed and in need of training and employment; and estimating how many of this group might be interested in and benefit from participation in an environmental employment and training program.

2. Assessing the nature and magnitude of current and future environmental manpower needs in both the public and private employment sectors.

3. Determining what types of training and employment programs would most profitably mesh the needs of unemployed young adults with the needs of the environment-related labor market. Preparing recommendations concerning the appropriate duration of such programs.

4. Determining the extent to which existing programs, facilities, and other financial and nonfinancial resources at the Federal, State and local levels may be utilized to implement such programs. Ascertaining methods for maximizing the use of existing available resources in order to avoid additional burdens upon the State capital and operating budgets.

5. Determining how the State may reap maximum benefit from the proposed Young Adult Conservation Corps program currently under consideration in Congress and from any other proposed Federal programs addressing the problem of unemployment, particularly in the young adult population.

6. Determining how the State may ensure that any proposed program will involve participation by a cross
