

acquired by surveying education and surveying experience, is qualified to practice land surveying.

(f) The term "professional land surveyor," within the meaning and intent of this article, shall mean a person who has been duly registered and licensed under the requirements of this article.

(g) The term "land surveyor-in-training," within the meaning and intent of this article, shall mean a person who complies with the requirements for education, experience and character and has passed an examination in the fundamental surveying subjects, as provided in §§ 12 and 14 of this article.

(h) The term "practice of land surveying," within the meaning and intent of this article, includes surveying or areas for their correct determination and description for conveyancing, for the establishment, or the reestablishment of land boundaries and the plotting of lands and subdivisions thereof. The plotting of lands and subdivisions may include topography and contours, the preparation of official plats or maps of said land, setting grades and determining drainage of streets and roads, and providing for storm drainage systems where such systems do not require the hydraulic design or structural design of system components and are restricted to the use, where relevant, of any standards as may be prescribed by local or State authorities. The practice of land surveying shall not include geodetic surveying, cartography or general real estate practices.

A person shall be construed to practice or offer to practice land surveying, within the meaning and intent of this article, who engages in land surveying or who by verbal claim, sign, letterhead, advertisement, card or in any other way represents himself to be a land surveyor or that he is registered under this article, or who represents himself as able or willing to perform those services which are commonly recognized as land surveying.]

[(i)] (F) [The term "Board," within the meaning and intent of this article, shall mean] "BOARD" MEANS the State Board of Registration for Professional Engineers [and Professional Land Surveyors, provided for by this article].

[(j) The term "property line surveyor," within the meaning and intent of this article, shall mean a person who, by reason of his special knowledge and the use of the principles and methods of surveying, acquired by surveying experience, is qualified to practice property line surveying and who is registered and licensed under the requirements of this article.

(k) The term "practice of property line surveying" within the meaning and intent of this article, involves
