

(3) Hearings and judicial review of Board decisions shall be in accordance with the Maryland "Administration Procedure Act" of this Code. In addition, parties complained against are entitled to be represented by counsel. Revocation, suspension, or denial of a license by the Board may not be stayed pending judicial review.

(4) If the license has been revoked or suspended, the current license to practice or teach shall be returned to the Board. If the revoked or suspended license has been lost, a statement under oath to this effect shall be filed with the Board.

(5) A revoked or suspended license may be reinstated after 1 year at the discretion of the Board.

(g) (1) Registered electrologist license fee shall be \$100 renewable biennially on October 31.

(2) Certified instructor electrologist license fee shall be \$100 renewable biennially on October 31.

(3) School of practical electrology license fee shall be \$300 renewable yearly on October 31.

(h) The Board in its discretion may reinstate a license upon an applicant's showing good cause and paying all past due renewal fees and a \$50 reinstatement fee.

(i) (1) An institution or school which desires to conduct an education program to prepare students for the profession of electrology shall apply to the State Board for Higher Education for approval to do so and subsequently submit evidence to the State Board of Electrologists Examiners that:

(i) It is prepared to carry out a program in theory of electrology education or a program in practical training in electrology; and

(ii) It is prepared to meet the standards established by this subtitle and by the Board.

(2) The Board shall evaluate the proposals of institutions or schools desiring to conduct an electrology program for students to study the profession of electrology and the need in that area.

(3) A survey of the entire electrology education program shall be made by the Board and the program shall be listed as an approved electrology educational program if in the opinion of the Board, the requirements for an electrology program are met.

(4) From time to time as considered necessary by the Board, the Board shall survey all electrology
