

educational programs in the State. Written reports of these surveys shall be made by the Board. If the Board determines that any electrology education program is not maintaining the standards required by the statutes and by the Board, it shall give notice immediately in writing to the institution or school conducting the program specifying the defect or defects found by the Board.

(5) If the defects specified by the Board are not corrected within a reasonable time to the satisfaction of the Board, the Board after an opportunity for a hearing, may remove the institution or school from the list of acceptable electrology education programs, and in the case of a school of practical training, revoke the license of the school.

(6) The electrology education program shall consist of a two-part program:

(i) Academic lecturing in theory of electrology for a minimum of 20 hours to be given by a physician licensed to practice medicine in the State, in an institution of higher learning; and

(ii) Practical education and clinical experience for a minimum of 80 hours to be given by certified instructor electrologist in school of practical electrology licensed under this subtitle.

(7) The Board shall attempt to establish a program of at least 2 years credit in electrology at an institution of higher learning.

(j) (1) An application for examination for license to practice electrology shall be made on an application supplied by the Board. The applicant shall show written evidence verifying successful completion of theory and practical education as defined by this subtitle. Examinations shall be administered by the Board at least twice yearly. Examination fee shall be \$100. The applicant may retake any portion of examination failed upon payment of reexamination fee of \$50. If failure occurs after two reexamination attempts, applicant must retake the entire examination and pay the examination fee of \$100.

(2) The Board approved theory examination shall be administered by the Board or institution offering theory education. Passage of the theory examination is necessary prior to proceeding to the practical training phase of qualification for licensure.

(3) The application for examination for a license to teach the practical education and clinical training of student electrologists shall be made on forms supplied by the Board. The applicant shall meet qualifications in this subtitle for certified instructor electrologists. The instructor examination shall be
