

[(e)] (B) If the [inspector] BUREAU discovers or learns there is an imminent danger existing in all or part of a mine, [he] IT shall order immediately the person then in charge of the mine to remove at once every person from where the danger exists. If the person in charge of the mine fails to comply with the [request of the inspector] ORDER, the [inspector personally] BUREAU shall take whatever steps [he] IT deems necessary to remove or have removed every person from the place where the danger exists. Every person shall remain out of all or that portion of the mine until the danger is ended.

[(f)] (C) In addition to any other authority conferred in this title, [a mine inspector or the Director of] the Bureau may enter and inspect any mine to determine the conditions of safety in that mine. If [either the mine inspector or the Director of] the Bureau finds the mine unsafe or operated in an unsafe manner, [he] IT shall order the unsafe condition corrected immediately. If the mine owner or operator fails to correct the unsafe condition, the mine shall be closed until the condition is corrected.

7-401.

[(b)] If the workings of any mine approach within 300 feet of the boundary line between the mine and any adjoining mine, the operator shall notify the district mine inspector who shall ascertain whether the workings of the adjoining mine, at their nearest point, are within 300 feet of the boundary line, and he shall immediately inform the operators of both mines. The operators shall have the approaching workings of the mines surveyed and shown on the maps of both mines. For the purpose of making this map, the inspector shall give written permits to engineers of either or both operators to enter and survey the adjoining workings of either mine

(c) The original map or a true copy shall be kept in the mine office at the mine, for the use of the mine officials and inspectors, and for the inspection of any person working in the mine whenever he reasonably desires to review the map or true copy.

(e) The operator shall furnish the district mine inspector a good blueprint or other exact copy of the original map for his official use. Every six months the operator shall furnish an additional copy showing any extensions. The blueprint or other copy shall remain in the Bureau's custody and may not be made public without the operator's consent

(f) If a mine is worked out or abandoned, within 60 days the operator shall extend the map of the mine to show clearly all worked out or abandoned territory. He shall furnish the district mine inspector with a good copy of the map, and a copy shall be sent to the Bureau to be kept as a
