

(d) A soil conservation district may conduct a training program for the control of sediment and erosion providing it meets the requirements set by the Department of [Health and Mental Hygiene] NATURAL RESOURCES.

8-1104.

(b) In Prince George's and Montgomery counties, the Washington Suburban Sanitary Commission, after consultation with and advice of the soil conservation districts of the two counties and the Department of [Health and Mental Hygiene] NATURAL RESOURCES, shall prepare and adopt rules and regulations for erosion and siltation control requirements for utility construction. The rules and regulations shall be adopted and enforced as are others of the Commission under authority conferred by other laws. These rules and regulations apply to any contractor doing work for the Washington Suburban Sanitary Commission. Utility construction may not be undertaken in Montgomery County until an erosion and sediment control plan is submitted to and approved by the Washington Suburban Sanitary Commission. After the county reviews and approves the plans, the Commission may issue a permit for construction. In every case conditions of any permit granted for work performed in Montgomery County by any contractor doing work for the Washington Suburban Sanitary Commission and by any public service company, as defined in § 2, Article 78, of the Code may not be less stringent than standards incorporated into the [the] provisions of any grading or building law or ordinance adopted pursuant to § 8-1103 of this subtitle. Montgomery County shall inspect and enforce the conditions of the approved plans and permits. The provisions of this subsection do not apply until the soil conservation district in the county approves erosion and siltation control requirements for utility construction in that county.

8-1105.

The provisions of § 8-1104 do not apply to any State unit. If a State unit undertakes any land clearing, soil movement, or construction activity, the Department of Natural Resources shall review and approve this action.

8-1105.1.

(a) There is a Beach Erosion Control District, which consists of that land bordered on the north by the boundary line between the State of Maryland and the State of Delaware, bordered on the east by the waters of the Atlantic Ocean, bordered on the south by the borderline between the State of Maryland and the State of Virginia, and bordered on the west by a line which coincides, more or less, with the west crest of the existing natural dune on Assateague Island, and in Ocean City, is a mutually approved line to be known as the State-Ocean City building limit line which
