

Subsection (b) of this section is rephrased in the standard language used throughout this article to state affirmatively that an individual must be licensed to practice a health occupation in this State. See also § 3-501 of this title.

The exception in present Art. 43, § 502 for "persons who are now actually engaged in the practice of such profession," is deleted as obsolete. The language refers to individuals who were practicing in 1920, none of whom are still in practice.

As to the relative authority of the State Board of Chiropractic Examiners and the State Board of Physical Therapy Examiners, and the relationship between the two health occupations, see the General Revisor's Note to this title.
