

this section, such extensions, projects or programs of major extensions of sewer and water facilities shall include those sewer mains of fifteen inches or over, water mains of sixteen inches or over, sewage or water pumping stations, force mains, storage and other major facilities, except such water mains which will provide only local service and may be of an above mentioned size merely as a small segment of a future main so as to avoid unnecessary and uneconomical duplication at the time of construction of a subsequent major project;

(2) Additions of new projects and the deletion, modification, or rescheduling of previously approved projects with respect to which a construction contract has not been let, or will not be let during the current fiscal year;

(3) An indication, by project, of those lines, or storm drainage facilities, for which construction contributions, have been made or committed, together with the amounts of contributions as of date of the preparation of the proposed program. Addenda shall be submitted for projects for which contributions are made or committed prior to approval or amendment of the commission's capital improvements program by the respective county governing bodies; and

(4) The following information with respect to each project, as applicable: (i) the estimated maximum diameter, length, and location of water and sewer lines, (ii) the design capacity, and approximate location, of pumping stations, (iii) the maximum population which could be served by each sewer construction item as it is proposed to be designed, (iv) the maximum area limits which could be served by gravity systems for each sewerage system construction item and the area which each such item is designed to serve, with such areas to be set forth in a general narrative statement and on a map; (v) the demonstrated need for each project which will include a presentation of appropriate facts justifying such proposed construction; and (vi) the estimated cost of each construction item in the program.

(c) (1) Each county governing body shall finally act upon, by way of approval, disapproval or modification, as more particularly hereinafter set forth, the commission's six-year capital improvements program. Such approvals or modifications may include as a part the designation of a water or sewer main as being of controlled or limited access for service to designated areas within that county. The final action on each annual commission's six-year capital improvements program shall occur only after public hearings on the program which may be conducted in conjunction with public hearings on the county governing body's own and other agencies' six-year programs or capital budgets. With respect to inclusion of surface water or storm drainage facilities in the annual commission's six-year capital
