

After June 1, 1957, the county council of Montgomery County or the county commissioners of Prince George's County, shall pay [one-half (1/2)] 1/2 of the actual cost within their respective counties that the Washington Suburban Sanitary Commission may be required to pay for the relocation or removal of any of its facilities by reason of any road construction or improvement required by any of the agencies above set forth. If any of the above agencies require the relocation or the removal of any of the facilities of [said] THE commission it shall give notice to [said] THE commission within a reasonable time of its requirements and upon receipt of which the commission shall furnish to such agency an estimate of the cost of such removal or relocation, and upon the completion of such removal or relocation, shall furnish to such agency an itemized statement of the actual cost of such removal or relocation, and unless such agency disputes any one or more of the charges in the bill rendered by [said] THE commission, it shall pay the same within six months after its receipt. In the event of any dispute of any charge made by [said] THE commission, the dispute shall be, within three months after rendition of the bill, referred to an arbitrator satisfactory to both the commission and the agency and if the commission and [said] THE agency are unable to agree upon an arbitrator each shall appoint one and the two shall appoint a third. If such bill as rendered or finally agreed upon is not paid within six months after rendition or agreement, it shall bear six per cent [(6%)] interest until paid and if a dispute goes to arbitration it shall bear six per cent [(6%)] interest after six months from the date of such finding by the arbitrators.

10-6. Bridges, culverts, etc.

Before any bridge, culvert or other structure intended for the purpose of permitting water to flow through or under any road or street in the Washington Suburban Sanitary District is constructed, the plans for such structure shall be submitted for review and recommendation to the Washington Suburban Sanitary Commission.

10-7. Contractors to give notice to commission prior to commencement of road construction work.

Any road construction contractor, defined as any person, firm or corporation performing or engaged or hired to perform road construction, repair, paving, repaving, or grading, all of which activities are hereinafter referred to as road construction work, in any public highway, street, road, or alley within the Washington Suburban Sanitary District in which the commission has installed a water, sewer, or storm drainage structure, prior to commencing the road construction work, shall give notice to the commission of the proposed road construction work, with the notice to include the proposed construction schedule with specificity as to contemplated construction dates and construction location information as required to accomplish the purposes
