

(f) Except AS TO POLICIES ISSUED ON OR AFTER THE OPERATIVE DATE OF SUBSECTION (K-1), AND EXCEPT as provided in subsection (h), the adjusted premiums for any policy shall be calculated on an annual basis and shall be such uniform percentage of the respective premiums specified in the policy for each policy year, excluding extra premiums on a substandard policy, that the present value, at the date of issue of the policy, of all such adjusted premiums shall be equal to the sum of:

(1) The then present value of the future guaranteed benefits provided for by the policy;

(2) Two percent (2%) of the amount of the insurance if the insurance be uniform in amount, or of the equivalent uniform amount, as hereinafter defined, if the amount of insurance varies with the duration of the policy;

(3) Forty percent (40%) of the adjusted premium for the first policy year;

(4) Twenty-five percent (25%) of either the adjusted premium for the first policy year or the adjusted premium for the whole life policy of the same uniform or equivalent uniform amount with uniform premiums for the whole of life issued at the same age for the same amount of insurance, whichever is less.

Provided, however that in applying the percentages specified in subdivisions (3) and (4) above, no adjusted premiums shall be deemed to exceed four percent (4%) of the amount of insurance or uniform amount equivalent thereto.

The date of issue of a policy for the purpose of this subsection shall be the date as of which the rated age of the insured is determined.

(g) [In] EXCEPT AS TO POLICIES ISSUED ON OR AFTER THE OPERATIVE DATE OF SUBSECTION (K-1), IN the case of a policy providing an amount of insurance varying with the duration of the policy, the equivalent uniform amount thereof for the purpose of the preceding subsection (f) shall be deemed to be the uniform amount of insurance provided by an otherwise similar policy, containing the same endowment benefit or benefits, if any, issued at the same age and for the same term, the amount of which does not vary with duration and the benefits under which have the same present value at the date of issue as the benefits under the policy, provided, however, that in the case of a policy for a varying amount of insurance issued on the life of a child under age [ten (10)] 10, the equivalent uniform amount may be computed as though the amount of insurance provided by the policy prior to the attainment of age ten were the amount provided by such policy at age [ten (10)] 10.
