

## EXECUTIVE ORDERS

C(14) Protect, regulate and provide for the recovery of Maryland's mineral resources, including sand and gravel, and provide for subsequent reclamation of land after extraction.

C(15) Promote and support sport and commercial fishing, harvesting of shellfish, harvesting of fur-bearing animals and waterfowl and their supportive businesses and at the same time provide protection from over-harvesting and enhance the habitat for the several species.

C(16) Consider economic stagnation, unemployment, and low per capita income in determining target areas for application of State funds and programs.

D. Policies to protect and improve the quality of the environment to ensure the health and well being of residents.

D(1) Protect and improve the quality of the Chesapeake Bay, its tributaries, other water bodies of the State, and ground-water resources.

D(2) Protect water resources from sediments, hazards, incompatible development, inappropriate land management, and municipal and industrial wastes.

D(3) Promote coordinated planning for issues requiring inter-jurisdictional action, such as river basin planning.

D(4) Manage air emissions to achieve air quality standards in an economically efficient way.

D(5) Manage air emissions to protect public health and to improve the quality of the environment in non-attainment areas.

D(6) Encourage the use of innovative and alternative wastewater treatment systems when appropriate and recognize the need for the suitability of private septic systems in certain areas of the State while seeking to make them compatible with the environment.
