

D(7) Promote safe waste management and resource recovery programs, with emphasis on the recovery of energy from solid waste.

D(8) Encourage use of materials made from post-consumer waste products.

D(9) Regulate toxic and hazardous materials in a manner which protects public health and the environment.

D(10) Minimize the potential dangers to people, fauna, and flora from natural and man-made hazards.

D(11) Promote minimal noise impacts in development decisions.

E. Policies to promote the efficient use of non-renewable energy resources and to encourage the exploration and development of new and alternate energy sources:

E(1) Promote exploration, development, and use of new sources of energy, both renewable and non-renewable.

E(2) Monitor and pursue energy efficiency in State programs and buildings.

E(3) Ensure that major energy facilities are sited so that adequate energy is provided at reasonable cost with minimum adverse environmental impact.

E(4) Assure the orderly development of coal, gas, and other non-renewable resources with minimum adverse impact.

E(5) Encourage alternatives to single occupancy automobile use, such as mass transit, ride sharing and the use of bicycles, and promote more efficient use of existing transportation facilities.

E(6) Promote the design and development of energy efficient communities and living and travel patterns, including those for pedestrians.

E(7) Promote the wise use of energy.
