

\$1,185,600, appropriated for the Fort Washington Marina as a part of this overall appropriation, may not be expended until the Budget Committees have approved a comprehensive plan for the renovation, construction, and operation of the Marina, including channel dredging, and including planned utilization of the private sector for such on-site services as construction or operation of boat docks and launching facilities, repair facilities, ancillary recreational and restaurant operations, store facilities, parking facilities, and the like. Such plans shall also provide for interim operation of the Marina during the construction period. Further, it is the intent of the General Assembly that the Department of Natural Resources shall make maximum utilization of existing facilities on the site, as determined by them to be feasible and practicable. Further, it is the intent of the General Assembly that the Department of Natural Resources, to the extent otherwise permissible by law, shall give preference to the existing National Park Service Concessionaires in awarding the initial contracts for service by private operators. Further, it is the intent of the General Assembly that the Department of Natural Resources, assisted by the Department of Employment and Training, shall thoroughly explore the feasibility of establishing an on-site training facility for the boat rebuilding and repair trades and report back to the Budget Committees by October 1, 1986....
