

(ii) Sterilize or clean the container in accordance with this subsection.

(2) To sterilize a container under this section, the manufacturer shall use:

(i) Boiling water;

(ii) Live steam;

(iii) A solution of sodium hypochlorite; or

(iv) Any other effective method that the Secretary approves.

(3) Instead of sterilizing a container, a manufacturer, before putting a soft drink in a container, may clean the container by washing it by machine with water that:

(i) Is at least 125 degrees Fahrenheit in the wash cycle;

(ii) Contains a cleansing mixture equivalent to a caustic soda solution of at least 2.5 percent in the wash cycle; and

(iii) Is pure and clean in the rinse cycle.]

[4-333.

Each individual who works in a manufacturing plant shall wear clean clothing when the individual is working in the manufacturing plant.]

[4-334.

(a) A person may not manufacture a soft drink in this State for sale in this State unless licensed by the Secretary.

(b) In this State, a person may not sell a soft drink manufactured outside of this State unless the soft drink has been registered with the Department.

(c) A manufacturer may not knowingly employ in a manufacturing plant any individual who has:

(1) A contagious disease;

(2) An infectious disease; or

(3) A skin disease.
