

so that consideration of alternative technologies is not precluded, nor the environment created for a limited response.

3. In assessing needs related to routine interhospital transfers, the Department shall conduct a "make or buy" analysis to determine the feasibility of subcontracting this portion of the mission requirements to private sector providers, considering the comparative costs, quality and effectiveness of the services likely to be obtained.

4. The Budget Committees shall be kept fully advised as mission requirements are documented, and various procurement milestones are reached.

It is the intent of the General Assembly that no solicitation may be published or contract awarded without prior approval of review by the Budget Committees.
