

Commissioner to determine the prevailing wage rate for "workmen and apprentices", for clarity. In practice, the Apprenticeship and Training Council sets the rate for apprentices based on a percentage of the rate determined by the Commissioner for mechanics in the same trade. See revisor's note to § 17-208 of this subtitle, which discusses the same issue.

Also in subsection (a) of this section, the former phrases "for the class or type of work ... in the locality the work is to be performed" are deleted as unnecessary in light of the substantive requirements of § 17-209 of this subtitle.

Defined terms: "Bid" § 11-101
