[(d) In addition to any other requirements of this section, any pesticide subject to this section which contains any substance in any quantity determined highly toxic to humans pursuant to the provisions of § 5-104, shall bear a label showing the following information:

(1) The skull and crossbones;

(2) The word "poison" prominently in red on a background of distinctly contrasting color; and

(3) A statement of an antidote for the product.

(e) Any pesticide, commonly known as standard lead arsenate, basic lead arsenate, calcium arsenate, magnesium arsenate, zinc arsenate, zinc arsenite, sodium fluoride, sodium fluosilicate, and barium fluosilicate shall be distinctly colored or discolored, as provided by the rules and regulations issued under this subtitle. Any other white powder shall be distinctly colored or discolored pursuant to departmental rules and regulations, if the Secretary requires this action after investigation and public hearing on the feasibility of coloration or discoloration and on the necessity for this action for the protection of the public health. However, the Secretary may exempt any pesticide, to the extent that it is intended for a particular use, from the coloring or discoloring requirements of this section, if he determines that coloring or discoloring for the use is not necessary for the protection of the public health.]

[5-108.

The Secretary, by written order, may remove from sale any pesticide which is adulterated, misbranded, or bears designation identifying it with a similarly identified product which is known to be adulterated or misbranded, or has been found to contaminate the environment by federal or State authorities. A person may not dispose of removed material in any manner without written consent of the Secretary, or the circuit court of the county in which the product is found.]
