REVISOR'S NOTE: This subsection is new language derived without substantive change from the first and second sentences of former Art. 56, § 271(d).

In paragraph (1)(i) of this subsection, the former references to "investigation" and "research" are deleted as included in the reference to any "other professional service".

In paragraph (1)(i)1 of this subsection, the former reference to enhancing "naturalistic and aesthetic values" is deleted as surplusage.

In paragraph (1)(ii) of this subsection, the former reference to designing an object or feature "as may be prescribed by local or State authorities" is deleted as unnecessary. An object or feature that the State or a local authority prescribes would be an object or feature that is "necessary to a service described in item (i) of this paragraph".

The third sentence of former Art. 56, § 271(d), which provided that a licensed landscape architect is not precluded from "performing any of the services described in the first sentence of this subsection in connection with settings, approaches, or environment for buildings, structures, or facilities", is deleted as surplusage.

The definition is stated in the infinitive form to allow minor verb variations of the defined term without taking these variations out of the scope of the definition.
