

each municipality which owns or operates a public facility affected by the plan, and to the Secretaries of Natural Resources, State Planning, and the Environment. A five-year plan can be adopted by the Service only after it is submitted to and approved by resolution of the governing body of each county and after consultation with the governing body of each municipality which owns or operates a public facility affected by the plan, or if the plan is not approved by each of the appropriate governing bodies within 120 days following submission of the plan for approval of the governing bodies, after the plan is approved by joint resolution of the General Assembly. If a joint resolution of the General Assembly approving a five-year plan contains any amendments or modifications to the plan, those amendments and modifications repeal the plan to the extent of any inconsistency. The provisions of this subtitle do not authorize the Service to take any action which would be inconsistent with the amendments or modifications without the approval of the governing body of each county and after consultation with the governing body of each municipality which owns or operates a public facility included within the plan.

(f) Upon adoption of a five-year plan by the Service, service districts shall be established in the manner and following the schedule set forth in the plan. Immediately thereafter, the Service shall proceed with the acquisition, extension, and construction of facilities set forth in the plan and assume jurisdiction over and provide for the maintenance and operation of water supply, wastewater purification and solid waste disposal projects included in the plan, for those projects within the service region and districts placed under the jurisdiction of the Service by the plan.

(g) The Service shall enter into contracts with municipalities and persons within a service district and stipulate the projects to be provided, the amount of compensation for acquiring existing projects, the charges to be apportioned to the municipalities and persons, the manner of repaying the Service for these charges, and the effective date or dates the Service will initiate the provision of projects.

(h) Existing projects providing water supply, wastewater purification and solid waste disposal services, including all rights, easements, laboratory facilities, vehicles, records and all other property, equipment, and furnishings necessary and normally associated with the operation of the facility, shall be transferred to the sole ownership of the Service at the time designated in the five-year plan. Compensation for existing projects may be based on the original cost of the project minus an allowance for depreciation, or on other terms and conditions satisfactory to the municipality or person transferring the project. All costs and obligations assumed by the Service incidental to the transfer of ownership of an existing project
