

<u>Regents, in consultation with the Maryland Higher Education Commission concerning the future enhancement of continuing education, particularly graduate and technical education. Once having received the report, the committees shall have 45 days for review</u>		
	478,910,899	
Current Restricted Appropriation	118,190,908	597,101,807

It is the intent of the General Assembly that, should the University of Maryland System restructuring plan "Achieving the Vision in Hard Times II" result in FY 1994 savings of \$2.7 million, priority be given to reallocating those funds to the University of Maryland College Park. Should funds become available, the university shall reduce enrollment for the Spring 1994 semester from a projected 21,500 full-time equivalent students to 20,500, *either by reducing enrollment of incoming freshmen or transfer students.* The university shall be held harmless by substituting its loss of \$2.7 million in tuition revenue with the first \$2.7 million of savings from the restructuring. ~~It is the further intent of the General Assembly that, in recognition of the high academic standards at College Park, the Maryland Higher Education Commission work with the university to modify statewide admission standards for transfer students.~~
