Section 18-109

Annotated Code of Maryland

(2000 Replacement Volume)

Preamble

WHEREAS, Immunizations are essential to protect the health of the citizens of Maryland and prevent the spread of potentially fatal communicable diseases; and

WHEREAS, Children under the age of 2 years are at the highest risk of contracting diseases preventable by vaccine that may otherwise lead to serious complications; and

WHEREAS, It is recommended that adults over the age of 50 years be vaccinated against influenza and pneumococcal pneumonia, but there is no way of knowing if these immunizations are being received; and
