

Also in item (1) of this subsection, the former word "conservation" is deleted in light of the words "maintenance" and "management".

Also in item (1) of this subsection, the former word "tillage" is deleted in light of the use of the synonym "cultivation".

Also in item (1) of this subsection, the former reference to "cultivation" of a commodity is deleted in light of the broad reference to "growing ... or producing of an agricultural or horticultural commodity".

Also in item (1) of this subsection, the former references to "dairying" and to raising of "livestock, ... furbearing animals, or poultry" are deleted as unnecessary in light of the express inclusion of dairy farms, furbearing animal farms, poultry farms, ranches, and stock farms in the definition of "farm".

Also in item (1) of this subsection, the former word "machinery" is deleted as included in the broad word "equipment".

Item (2) of this subsection is revised as an additional type of "agricultural work", rather than merely an example of agricultural work under item (1) of this subsection. Although former Art. 100, § 80A(a)(3) defined "[a]gricultural employment" to "includ[e]" the work listed in item (2) of this subsection, that work seemingly does not need to be done "on a farm" so long as the work is done for an owner or operator of a farm.

Defined term: "Farm" § 7-101
