Section 1(3)(E)(1)

[(f) Not more than \$555,000 to provide grants for the modernization and restoration of privately-owned septic systems, provided that this appropriation for the Septic System Modernization and Restoration capital program shall not be expended until the budget committees review a report provided by the Department of the Environment that (1) identifies other State programs providing septic system assistance and funding to homeowners, including the Department of Environment's Innovative and Alternative Septic System program and the Department of Housing and Community Development's Indoor Plumbing Loan program; (2) describes each septic system program, including purpose, statutory authorization, eligible types of housing, eligible applicants, loan or grant terms, eligible improvements, current and prior federal and State current fund balances, and review criteria used by each department to decide which applicants receive funding; (3) explains how the various septic system programs are coordinated to form a comprehensive State septic system improvement program that prevents duplication of septic system assistance; (4) provides information, if available, on income levels of past beneficiaries of each septic system program, including information on the number of beneficiaries who have received assistance from more than one program; and, (5) quantifies the statewide extent of the septic system problem. The report shall be provided by August 1, 1990;]
