

Q. Mr. Hagner—Have you any knowledge that the ticket on which your name was printed was particularly affected by the proceedings of the military at the polls?

A. I have no personal knowledge on this point, except what I have already detailed. I was not present at any of the other polls.

Examination in chief here closed.

Mr. Dent came in at 11 A. M.

CROSS-EXAMINATION OF MR. CRISFIELD.

Ques. By Mr. Alexander. You have stated that if the election had been perfectly free and fair, Mr. Long would in your opinion have received twice as many votes as Mr. J. J. Dashiell and Mr. White together would have received—that is, in the Princess Anne district.

Now say what in your opinion would have been the result of a perfectly free and fair election in that district, as between Mr. Woolford, Dr. Dashiell and Col. Graham?

Ans.—Col. Graham would have received, in my opinion, very few votes. Col. Woolford is in that district a very strong man. The contest might have been somewhat doubtful, yet I thought then and think now Mr. Dashiell would have beaten him in that district.

Ques.—Mr. Alexander. What is your estimate of the number of votes which each of the before-named candidates would have received in that district if the election had been perfectly free and fair?

Ans.—I should not think that Col. Graham could have received more than twenty or thirty votes in that district; the residue of votes cast would have been divided between Colonel Woolford and Dr. Dashiell, Dr. Dashiell getting the majority—say between ten and fifty.

Ques.—Mr. Alexander. What in your opinion would have been the result of a perfectly free and fair vote throughout the whole county, as between Col. Woolford and his competitors?

Ans.—I think that Dr. Dashiell would have beaten Colonel Woolford. The truth of it is that had there been a full and fair election that Col. Graham would not have received as many votes as he did get.

Ques.—Mr. Alexander. Assume that Col. Graham would have received as many votes as he did get, and say what in that event would have been the result of a free and fair election throughout the County for Clerk?
