

# HENSON'S MENTAL STATE.

## Another Examination of the Condemned Man by Medical Experts.

[Special Dispatch to the Baltimore Sun.]

ELLCOTT CITY, Md., May 27.—There was another delegation of doctors here today inquiring into the mental condition of the condemned murderer, Jacob Henson, Jr., in whose behalf efforts have been made for executive interference. The visitors were Dr. L. G. Smart, assistant superintendent of the Shepherd Asylum, who came in place of the superintendent, Dr. E. N. Brush; Dr. C. G. Hill, physician in charge of Mount Hope Retreat; Dr. B. W. Dashiell, member of the state lunacy commission, and Dr. William Lee, also of that commission, who was here a few days ago upon the same inquiry.

The doctors stated that they would report to the Governor immediately. They left the impression in the minds of persons with whom they conferred while here after leaving the jail that their finding in the case would not tend to influence the Governor to commute Henson's sentence.

It is stated here by officials that the documents in the case so far presented to the Governor by the physicians show that Henson is considered sane and responsible for his actions.
