

Annapolis 16 March 1894,

My dear Mr Wilson,

Mr Hays sickness has delayed the presentation of our report and nothing can be done until he returns on Monday. Should he then be absent I will seek some one else to advocate it -

I have received a postal from "Mr" Job Evans, care Aug Donath, 611 - 7th St N. W. Washington DC" stating that he has the "detail plans" which were owned and made by his grandfather Job Evans and asking if they can be of use to us? This is worth looking into, perhaps you had best write to him -

I have seen the old desk here belonging to a Mr League which came from the Senate chamber. It is not improbably the desk of the two clerks of the Senate and may be as old as Washington's

time. It is certainly very old and
of solid mahogany but could be
restored. I think the original chandelier
was very like those now in the Annex.
If it were possible to see Mr Hayer as
he will not probably come down before
Tuesday it might expedite matters.

There is a session Monday night but he
seldom gets here for it.

Wayward Bartlett & Co. put in the
heating apparatus at which time the
old audirons were removed. This
was before the renovation & the placing
the iron girders.

Very truly yrs

Frank B. Hayer

J. Appleton Wilson Esq.

Mr Crim says he sold audirons
to a lady in New York City.
