the regiments, putting into his hands an account he had
 just then received: Lord George desired to check it at
 his office, and, on his return, admitted that the king
 was right. The king then told him, that it was the
 opinion of the foreign officers in the American army,
 that if the general landed a few miles from New-York,
 he would be successful, but if he landed at the city he
 would be beat. The king added the names of those offi-
 cers, and the service from whence they were sent. His
 secretary of state knew none of those particulars. His
 Majesty's intelligence of every thing concerning the
 America has been remarkably accurate.

The following is a picturesque de-
 scription of the state of affairs.—The country gentlemen
 of North-America lost. The West-
 Indies being lost also. The Emperor of
 Russia is making a settlement in our
 country. The French preparing a
 trade with North-America
 for their islands, while
 the Spaniards are sending

September 14. A weekly paper says, we are assured
 by a gentleman who has a good opportunity of know-
 ing the fact, that the remittance of the treasury, for
 the purposes of the American war, are not one penny
 less than the enormous sum of 10,000,000 per week.
 The last time the king conversed with Lord George
 Germaine, he asked him how many men he expected
 the British would send? His lordship replied 20,000,
 including the troops from Glasgow. No, replied his
 Majesty, the number will be only 12,000, and that
