Death has put an end to the blashhemies of that writer, so celebrated for his uncommon talents. so curpable on account of that ramous man, who, in the fight of all Europe, spent his whole lefe in defending and propagating implety. As a philosopher, raih, and without principles; as a poer, licentious and dislotter; as an historian, void of judgment and good failing laying claim to all the friences, without going jeep into any; eager to degrade all merit that flood in his own way; and profitturing his talents and his labour disputs. wy; and profitting his taients and his labour during the course of his long life, for the purpose of decoming the oracle and idol of his age. He knew web that mod readers are incapible of discussion, or ferrous examination and rest choin, and that every thing which terror to deliver their from a terror of religion which puls a restraint on the passions, is received with engerness and applaure. Hence the implettes which he uttered are featoned with force facilitations jetts; hence he pages not the shapest satie; and, if he undertakes to solvere the doctrines of our religion, dissignes them by the ridicule thrown upon them. Or do-s he se k to detroy the immortanty of the soul, the soundations of mornity, and the rewards and punishments of a future life, he ricurs not to reasoning; he assumes the tone of roll-lery and irony; he tries to excite laughter; he mins every thing to a jeth. It matters not that he alvan s absurdities, that he often contradicts him eif, and deferves no credit; nothing flops fum, if he can procure himself re ders. In thost he employs against religion the most diffolute libertinism, and the depravity of the most corrugt heart."
