

Extra of a letter from Barcelona to a gentleman in New-London, dated March 10, 1786.

The obstacles that have hitherto existed against your trade with the Mediterranean, seems now to be removing. As captain Lamb and captain Randall have purchased a ship, and are going to Algiers, it is said with a considerable sum of money, to treat on the subject of a treaty with the United States; which there is no doubt will soon be accomplished.

To be SOLD, on Thursday the third day of August, A VERY valuable tract of land, lying on the Head of South river, containing sixty acres, well improved; there are a good dwelling house, kitchen; meat-house, hen-house and all other convenient out houses, a paved garden, apple orchard, and all other kinds of fruit trees, 8 acres of meadow ground now fit for the sthe; there are also two very fine mills, one a fulling, and the other a grist mill, with a never failing stream of water, all in good repair; stock of all kinds, horses, cattle, and hogs, some household and kitchen furniture. Three years credit will be given for all sums above three pounds. Bond with good security will be required. 100/76 w3 LEONARD GARY.

Annapolis, July 1, 1786.

THE visitors and governors of St. John's College, in the state of Maryland, at a meeting on the 10th of May last, resolved, that the unfinished house on the four acres of ground, within the city of Annapolis, lately granted to them for the use of the college, be repaired and completed; that it constitute the main building of the college; that wings be added thereto; and that the whole be constructed as nearly as may be agreeably to a plan laid before them, by Mr. Joseph Clark; that Mr. Thomas Stone, Mr. Nicholas Carroll, Mr. Alexander Contee Hanson, Mr. James Brice, and Mr. Charles Wallace, or any three or more of them, be fully authorized to make any contract or contracts, relative to the said work, and for the purpose of carrying it on, to draw on the treasurer for any money which he hath or may have in his hands, except only the sum of £.300, out of the second year's public donation.

The committee, thus appointed and authorized, think proper to give notice, that they have engaged Mr. Joseph Clark, for a moderate monthly allowance, to purchase materials, to employ workmen, to superintend the work, and to have it executed, under their direction and control, upon the most reasonable terms, and with all convenient dispatch.

The funds for enabling them to discharge their very important trust are considered as ample and sufficient. They consist of the first two years public donation of the sum of £.1750 annually, and the sums voluntarily subscribed by private persons. Only one year's public donation has been received, and £.300 agreeably to the direction of the legislature are to be reserved out of the second year's donation; the gross amount of the sums subscribed is about £.10,000; but although a considerable time has elapsed since the subscribers were called upon by the treasurer to pay one third part of their subscriptions, which was payable on the 1st of June 1786, not more than £.200 has been paid into the treasury.

As the community is deeply interested in procuring a more general diffusion of science; as the want of a liberal instruction of youth during the late war has rendered it more immediately necessary to institute proper seminaries for the rising generation, the committee conjure the subscribers, by every consideration which can actuate good citizens, to perform their engagement without further delay.

Should this reasonable and just requisition be complied with, the committee entertain the most sanguine expectations, that, in less than twelve months, the subscribers will have the satisfaction of beholding a grammar school flourish within those walls, which lately were mouldering into ruin; and that in little more than another year, will be completed such an institution, as, from its numerous advantages, cannot fail to rival the most celebrated seminaries within the United States.

A prospect like this must be pleasing to every honest and enlightened mind. If it be not realized, the committee are persuaded that the disappointment will be owing solely to the remissness of those who freely and voluntarily entered into the engagements which they are now called upon to perform. The visitors and governors have indeed a power of enforcing a performance; but every mode of coercion would be mortifying to them, disgraceful to the subscribers, and productive of delays, detrimental to the cause of humanity and learning.

By order, E. RAMSAY, secretary.

DR. FENDALL

Is just arrived in this city, and may be spoke with at Mr. Joshua Frazier's.

THE doctor cures the scurvy in the gums, be it ever so inveterate, first scaling and cleaning the teeth from that corrosive, tartarous, gritty substance which impedes the gums from growing, infects the breath, and is a principal cause of the scurvy, which, if not timely prevented, eats away the gums, so that many peoples teeth fall out sound: he prevents teeth from rotting, keeps such as are decayed from growing worse even to old age; makes the gums grow firm to the teeth; and renders them white and beautiful; fills up with gold or lead those that are hollow, so as to render them useful, and to prevent the air getting into them and aggravating the pain: he transplants natural teeth from one person to another, which will be as firm in the jaw (without any ligament) as if they originally grew there; and makes and fixes artificial teeth with the greatest exactness and nicety, and without pain, so that persons may eat, drink, or sleep with them in their mouths as conveniently as with natural ones, from which they cannot be distinguished by the sharpest eye: he also engrafs teeth on old stumps, and extracts teeth and stumps in the easiest manner, be they ever so deeply situated in the jaw.

The doctor thinks the teeth of children should not be neglected, for by cleaning them, even in their tenderest state, with proper medicine, will prevent a number of diseases—great care should be taken of the second dentition of children, to prevent deformities, diseases, and to preserve their beauty—nay, the treatment of the first dentition at once concerns the health and life of children, and the soundness and beauty of all the teeth which they have already grown, or ever will have afterwards, and nothing can be more short sighted and erroneous, than the notion that the first teeth require no care, because they only last to the seventh year—he repeats it, the goodness and beauty of the second teeth, depend on the care of the first, &c.

His DENTIFRICE he has found to be greatly superior, both in elegance and efficacy, to any thing hitherto made use of for the teeth and gums: it is free from any corrosive preparation, will restore the gums to their pristine state, prevent the tooth ach, and render the breath delicately sweet, (if the tartarous substance is off the teeth) and will remedy all those disorders which are the consequence of scorbutic gums. It may always be procured at Dr. FENDALL'S residence, in Charles county, near Port-Tobacco, Maryland.

Dente quid horridius nigro, quid pulchrius albo?

N. B. The sooner gentlemen and ladies apply, the better, as the doctor's stay in this city is uncertain; he leaves this town for Baltimore.

CUB,

is in high perfection at the subscriber's, and will cover the ensuing season for six pounds, and a dollar to the groom.

It is useless to insert Cub's pedigree, as it is well known he is from the first stocks in England and Arabia. Many of his colts have shewn themselves equal (if not superior) to any running horses on the continent; those out of inferior mares are fit for service of any kind.

I have good pasturage at two shillings and six-pence per week, and any gentleman may be supplied with corn for mares left, if required, and great care taken of them, but will not be answerable for escapes or other accidents. 12X WILLIAM COURTS.
