tut "Thousands" has ased none other, in the course f his whole inimitable address. It is perhaps to his author's notorious attachment to truth, that we are indebted for this and several other productions, written with fuch nice art, that not one in twenty is capable of perceiving his drift and intention. To to great a degree has he the merit of an improver, that he may claim at least equal credit with the original inventor. His very first essay, under the band's neglect, or care essents.

HENRIETTA ADAMS. vas a master-piece. He was even driven to the neeffity of explaining himself, by a second essay, calulated for those only who read straight on and sufbeet nothing.

Had not Aristides already discussed the subject of nstructions, to the entire satisfaction (he believes) f a great majority of his most honest and enlightend readers, he would bestow some further comments. in the stale arguments introduced in an extraordinaand almost unquestionable shape. He may be nistaken; but he cannot forbear suspecting, that Thousands" has eicher distinguished himselt as the uthor of certain late anonymous letters, or has been tunate enough to obtain the well merited confidence that very liberal writer. However ill-founded. nay be his consecture, Aristides must, for the preent, decline making those acknowledgments, which hany well-meaning persons may think due from him o" Thousands". He thinks proper to take the arliest notice of this singular poduction. Having but just seen it, he has not indeed time to comment further, if he were even so inclined. His disappointnent does not greatly disturb his tranquillity, for, hatever knaves may suppose, or suggest, he looked or no other reward, than the approbation of his own conscience, and the esteem of virtuous citizens. That he receives no fullome address, of approbaion, or thanks, shall be no motive with him for deerting the fide of truth and justice, and adhering to enstrance the cause of interested, disappointed, and enraged lemagogues.
