MARTLAND GAZBTTE

THURS D. A.Y., SEPTEMBER 25, 1788.

TOULON, June 19.

HE fetes on account of the arrival of the Indian ambaffadors fill continue with great magnificence. On the 14th very brilliant fire-works were displayed *** in their presence; the first piece was a Bying dragon, which terminated in a very large eaftern flar; the second was a cross of Malta, and the third represented an Indian with a palm before him, and a large crescent over his head; on seeing the latter they shewed a joy bordering on extacy. They behave with the greatest politeness, and appear to have good tempers. In a ball given to them they ingroduced their hockahs to fmoke, when one of them offered his to a lady, who took two or three whiffs. On the #1st they are to be at Marfeilles, where they will remain three days. Amongst the presents they bring for the king is a superb ivory canopy and shrone, enriched with diamonds-a crown and sceptre also of inestimable value. The young prince who is with them is named MISSAEL. It is said the object of their mission is to conclude a treaty of alliance between their sovereign Tippoo Saib and she French king. Three of their fuite died on the pailage. VIENNA, June 18.

According to some we learn, that the Turks have Inished their bridge over the Danube, near Cladova, and that three of their corps, of 20,000 men, each of whom are Spanis, have passed the river -They reckon that the Ottoman troops, when encamped against the emperor, will form an army of 150,000 men: and according to the last list our troops in Transylvania amounted to 22,300 men, in the Bannat to 11,800, and to 103,300 near Semlin.

July 5. Letters from the prince de Cobourg, of the 28th of June mention, that the Russian army under the command of general Soltikow had actually passed the river Dniester on that day, and was expected to join the Austrian army on the 30th.

FRANKFORD, June 21. We are affured that a confiderable body of Turks table. have entered the Bannat, and burnt many villages.

Prince Lichtenstein's army, in Croatia, has been Arong!y entrenched for some time, that general.having been obliged to detach part of it to reinforce the line on the frontiers.

According to some papers, the Poles on the frontiers have quitted the French dreis for that of their own country, the Turks having declared that if they enter the territory of the republic they will hurt no one cloathed in the Polish manner.

Extract of a letter from the Madrass Courier, December

We have intelligence, which we believe may be relied on as authentic, confirming former accounts and opinions, as to the unformidable fituation and powers of Tippoo. The latest advices say, that his strength is considerably weakened by desertion, and that even mutinous murmurs are general throughout his army, from the want of pay. He is affected besides by a severe return of the indisposition under which he suffered some time ago."

July 10. A morning paper of yesterday says, that, by advices of the first authenticity we are enabled to fay, that on the 14th of last month, the Swedish fleet, confilling of fifteen sail of the line, were at the entrance of the Gulph of Finland -On the 18th of the same month, the Russian seet sailed from Cronitadt-and were composed of fixteen sail of the line, among which were two first rates, mounting 100 guns each.—An action between these two powers is therefore looked for as a consequence almost inevi-

Extract of a letter from Naples. June 16.

An Algerine rover, of 20 guns, was funk the 30th of last month by a Genoese man of war near Messina, after a severe and bloody contest of 2 hours, and all on board perished. So desperate and sanguinary were the infidels to the last, that they kept up a brifk and almost incessant fire with small arms out of the tops, and from different parts of their ship, into the man of war as they were finking, which killed and wounded above 20 men; most of the latter died the next day, owing to the balls which the pirates fired being all chewed."

"The annual reviews commenced here the 26th properly, the root of abundance, introduced by Dr. of last month, which was hard fatigue, as the season Lettsom, growing in the garden of Mrs. Wilson, of here is very warm. Two large of the wings and running to meet him. What ren- globes of fire, seemingly about the bulk of a Bristol ders this uncommon attachment the more remarkable barrel, were seen to move horizontally for a few misis, that the gentleman was never so much as present nutes at the height of seven or eight degrees from the while his poultry were feeding. Singular as are the furface of the earth. They then approached and above particulars, we can vouch for their not being dashed violently against each other, till some kind of cetrifugal force separated them, after which they steered different courses; one moving east-south east, and the other west and by north. As many persons were then up in the town, numbers repaired to an adjacent hill for the advantage of prospect. The meteors proceeded flowly in their course for about twenty minutes, when that in the fouth east quarter burst with a crack that might be heard at ten miles distance. The other continued gradually descending

> ble horizon. It is faid that the dey of Algiers has declared war against the empress of Russia, and that a stout seet had lately sailed from that port, manned with crews of desperate fellows. It is also said, that the evening before the armament weighed anchor, the der sent for the Chef d'Escadre, with the rett of the princ pal officers, when he promised a reward of 2000 sequins to the first that should bring and lay at his feet the head of the English rebel, Paul Jones.

July 19 Official dispatches were on Monday last received from the dake of Dorset in Paris. They state, that the French dispatches from India mentioned an expedition which the governor of Pondicherry was undertaking against Trincomale, in consequence of a sloop that was dispatched in November last, with the information of the probable rupture between France and this country, and authorifing the governor of the French settlements in the East-Indies to arm: that this armament was in consequence prepa-

The above is all the information yet received in France; but the most satisfactory part of the dispatches sent by our ambassador there is, that the French government had given this notification, in case it should turn our, that Trincomale was taken ; Extrast of a letter from Gibraltar, dated June 1, 1788. the English ministry might, however, be assured, that the most speedy and effectual steps had been taken to stop every warlike preparation in India, and that if any hostilities have been committed, the possessions should be immediately restored, with every satisfaction of damages.

Extract of a letter from Stockbolm, June 27. Before his majesty went on board the fleet he

sent notice to the Russian ambassador, count Raramousky, by M. Bedoire, the master of the ceremonies, that he could no longer look upon him as a Russian minister at his court, and therefore the sooner he could make it convenient to depart the better. Notwithstanding all these appearances and preparations of war, the trade with Russia goes on as usual."

KINGSTON. (Jamaica.) August 16. A correspondent having taken the trouble to transmit the following article from an out-port, we cannot doubt but it means something-as it is rather beyoud our ken, the reader will please interpret for himself:- In Titchfield, Portland, lives a gentleman, by trade a barben and hair-dreffer-looking into the sea from the house he lives in, saw a shark about ten or twelve feet long, swore to his neighbours standing by he would go, and bring him, the shark, ashore-Immediately stripped naked and went into the sea after the monster; he went without any weapon of defence, but lucky for our hero the shark did not choose to be shaved or dressed in any way, but made into the deep, and the barber loft fight of his pray, and obliged to come ashore again as he wens in, with all his arms and legs-this is a fact !"
