VERSAILLES, August 14.

HE king filled the vacant places in the ministry on the 4th instant. His majesty informed the national affembly of his choice by a letter, which forms one of the most precious monuments in the annals of monarchy. For the purpose of producing still greater unanimity in every department of administration, and to prevent the influence of favour or predilections, the king has ordered that henceforth all nominations to offices, employments or church benefices, magistracy, foreign affairs, war, marine, finance, and the king's houshold, shall be decided in open council. It was the king's intention to nominate M. Neckar chief minister; but M. Neckar receiving that proof of his majesty's confidence with respectful gratitude, begged that he would neither bestow upon him rank or title. This minister having demanded of the king to be relieved of a great part of the finance department, his majesty has re-established the office of comptrollor-general, and given it in charge to M. Lambert, whose application and integrity are already well known. He will unite his labours with the king's, in presence of M. Neckar first minister of the finances, who with the king's permission has reserved to himself the royal treafury, and the taking of his majesty's orders for the nomination to places and employments.

LONDON, August 17.

The king of Spain though he has succeeded to the throne, has not yet been formally anointed and crowned as king of that noble country. We are informed by a correspondent at Lisbon, that the Spanish grandees have entered into a combination not to assist, countenance, or recognise the validity of that ceremony, unles the king shall agree to re-establish the cortez, and take the oaths that were made in former times by the sovereigns of Castile and Andalusia, to their new subjects. The truth of this will soon appear.

General baron Scaleissen is arrived in England, charged with an important commission from the king of Prussia, in whose service that veteran now holds a

distinguished rank.

The object of his commission is not certainly known; but it is believed in the high political circle, that it comprehends two important and distinct things: To solicit the hand of the princess royal for the

prince of Prussia; And to settle the conduct of the two courts on the

election of the king of the Romans.

Advices are received from Maestricht, that since the affair of Tirlemont, the prince bishop of Liege has assembled all his troops to protect his own dominions, and has forbid the disaffected of any country whatever from taking refuge in his territories, or to make any settlement therein.

The eclat of the French revolution has roused the Spaniards from a nap of two centuries, and in Seville and other parts of Spain they appear to be conscious that there was a time when they had no inquisition, and a time when they had a cortez.

A REMEDY for RINGWORMS, ITCH, &c. Extract of a letter from a gentleman of the faculty, at Fort St. George, to doctor B. of the Bengal establishment -(Extracted from a London news-paper.)

" Sir PAUL JODDRELL, from his skill in botany, has made a discovery which is likely to prove of the greatest importance to the health and ease of Europeans in India, and will tend to the extirpation of that cruel and most tormenting of all maladies, the ringworms; memory; and the faithful and attentive discharge of and the remedy is as simple as it is esticacious. It confifts in nothing more than a frequent embrocation or friction of the parts where the eruption prevails, with common musiroom-ketchup. This remedy, simple as it appears, has never been known to fail in removing the ringworms, itch, or any other cutaneous eruption, after every other nostrum has failed.

"Sir Paul accounts for the efficacy of this vegetable curative, in the known noxious property of the mushroom to all animalcula. The folution or effence of this fungus is proved, by this direcvery, to bear such enmity to the minute infect, which is the occult cause of this disorder, that it immediately perforates the cuticle, and totally exterminates the infection. The experiment is easy, and a trial is recommended to those afflicted with ringworms, tetters, or cruptions of any
