WARSAW, May II.

Boossoo Broossoo of HE revolution so happily begun will according to all appearance, be completely confolidated, without violence or tumult. At Lubin, indeed, a weak incffectual shew of opposition to it, has

Decembre been discovered; but in Great Poland all ranks and degrees of men applaud it with transport. On the 8th instant the king, accompanied by all the

senators, ministers, and officers of the crown, went on horseback to the church of the holy cross, between multitudes of the citizens and others, by whom the Areets were lined. The air was rent by acclamations of vive le roi, vive le nation!

MADRID, May 8.

Our government is very much perplexed; fresh measures are thought necessary. The obedience of the people is not lessened, but requires to be nicely managed; and though the precautions of government appear diminished, they are in reality augmented. They talk very much of the arrival of eight prisoners, who were brought here the latter end of last month; two were in a private carriage, and the fix others in a common one; they were escorted by a detachment of cavalry.

GENEVA, May 20. It is very true that the king of Sardinia has fent a small army into Savoy, with 32 field-pieces.

We likewise learn, that the canton of Berne will assemble from 8 to 10,000 men, who are to act in concert with the troops of Savoy, and with those which are at Porentine and in Tirol, the number of which amount to 8000 men. Thus, in our vicinity alone, there are already 24,000 well disciplined troops.

P A R I S, May 19.

A young man arrived from Nice at Marseilles: He wished to go through France-he was asked for a pastport-he had none. "You must go to the municipality"-so he did. "Sir, said he to a clerk, I want a passport." "What is your name?" Augustus Frederick." " No other name?" " No." " Who do you belong to?" "To my father and mother." " Are you of the department (county) of the mouth of the Rhone?" " No, Sir." " Of what department are you?" " Of the department of the Thames." " What is your father's name?" " George." " What trade does your father follow?" " He is king of England." The clerk, who had not attended to the name of the department, was a little roused when he heard the quality of the youth's father; and, with all the gravity in the world, delivered the paffport to Mr. Augustus Frederick, son of Master George, of the department of the Thames, faying, "here's your passport, Sir, and I wish you well over the kingdom; bon voyage, mon petit

May 26. The baron de Thugut, a person of confidence with the house of Austria, is just arrived here. He is faid to be charged with a fecret and important commission, and the public attention is consequently much fixed on his motions. Whatever may be the object of his visit, we shall be sure to have it through the medium of the diplomatic committee, as nothing can be now effected here, but with the concurrence of the national affembly.

Yesterday, for the first time since the barbarous, impolitic, and ever to be execrated revocation of the edict of Nantes, a congregation of protestants were feen in Paris, under the Ægis of the law, publicly worthipring the Eternal, according to their rights! M. Maron officiated as minister, and it is but justice to say, that we never law a clergyman perform the fervice with more fervency, order and propriety----- His text was, ipent, the day is at hand; let us therefore cast off the works of darkness, and put on the armour of light." Rom. chap. xiii. ver. 12, 13. He dwelt long on the goodness of the Divinity, that in his wisdom suffered man to be persecuted to try his faith. He expatiated widely on the fage and philanthropic decrees of the national assembly; and earnestly exhorted his auditory to prove their gratitude by a strict, formal, and an uninterrupted obedience to the law, the nation, and the king. There were above 2000 present on the occasion-all the English in Paris assisted—the attraction for the artillery to proceed in proving all the new was irrelittible.

We learn from Nantes, that the fociety of the friends of the constitution there, not only went into mourning for Dr. Price, as the Jacobins here did, but have the declaration of the rights of men-to name one of English revolution, to read his funeral oration.

LONDON, May 20.

The unfortunate situation of the bank of Amsterdam, feems to give fresh alarm every moment to the Dutch, who have been for some days past calling their money home from our funds. It seems a doubt whether any temporary assistance will be able to establish its credit for a continuance.

Remittances to a considerable amount arrived by the packet on Thursday from America. They consist of bills drawn in the name of the United States, on their agent at Amsterdam.

The American bills are printed in a peculiar way,

A well known miser in this city, who is possessed of no less a sum than 150,000i. in different kinds of stock; went to his tallow chandler's a few days ago, to buy a few pounds of common candles. The tallow chandler made him a present of a pound of moulds; with which act of generouty the miser was, no doubt, well pleased. When he got home, however, a difficulty arose, as he had no candlestick that would admit them: to reduce the end by scraping, would have been to waste them. The miser bethought him, that as he was known at the bank, he might borrow a leave of the directors, unless he would engage, by a The weekly confumption of coals amounts to 11,000 for a parrallel to this.
