THOMAS BOYD.

(XLVIIth YEAR!)

MARYIAND GAZETTE.

KINGSTON, (Jamaica). October 11.

Common Andrew R. COKE, one of the bishops of the Methodist church, and who was in this island fome time ago, arrived in London, in July last, from North-America .- This gentleman. from his known character, and a certain consequence derived from his ecclesiastic and academical appointments, was fulpected of casting a longing eye to the supremacy of that extensive sect: But at their first annual meeting, since the death of the venerable and laborious Wesley, which took place in Manchester the 26th of July, it was found that the general government of the Methodist societies had been vested seven years ago, by deed enrolled in chancery, in one hundred persons, selected from the body of itinerant preachers, and who are to choose a president and secretary annually. Oct. 12. America, at present, can well dispense

with the service of other nations, in the carrying trade, and she is already able to repay some of the assistance the formerly received from them in that line. This will plainly appear from a view of the shipping in the port of Liverpool, on the 23d of last June; for, of the number of vessels bound for the different ports of the United States, five only belonged to Britainwhereas the American flag was displayed by twenty.

Sugars, not the top of the market by seven or eight shillings per cwt. were fold, on Monday last, at 84s. by the hogshead.

Oct. 13. A stout healthy negro woman, who had partaken of a land crab, on Sunday morning last, died in great agony on Tuesday: She was seized immediately after having eat of it, with violent reachings, which continued almost without intermission till the time of her decease. Whether the crab was of a poifonous species, or something deleterious had been introduced, could not be ascertained, as not the smallest portion of it was left.

A small piece which had been given to another woman, and of which she ate, had nearly produced the fame confequences, as the was dangeroully ill for two

Off. 14. Yesterday anchored in the harbour of Port Royal, his majesty's ships Centurion, W. A. Otway, Elg; commander, and Hound, J. Lawford, Elg; commander, in seven days from Port-au-Prince.

The accounts brought by these vessels are extremely unfavourable to the interest of the white inhabitants of the colony of Hispaniola. Divided among themselves, they cannot but fall an eafy facrifice to that power, which, at present, carries every thing before it.

NASSAU, (N.P.) September 9.

If credit is to be given to reports which have been in circulation here for some days past, a very bloody scene must have been recently acted in St. Domingo. We are told, that a vessel from Cape François, or the Mole, we know not which, having on board more than forty persons of both sexes, who had escaped from the vengeance of the triumphant party (in which is included the Gen de Couleur, called off Harbour Island a few days fince, for water and provisions. This veffel, it is also said, was commanded by capt. Downham Newton, and was bound for Charleston.

B. Q. S. T. Q. N. November 3. Official accounts from France.

Since our last, captain Mungo Mackay, jun. in the brig Mermaid, arrived in this port from Havre-de-Grace, in France, which piace he left the 10th of deptember. Among the patiengers is captain S. Dunn, of this town, together with melles. Parrinan, Coolidge and Mackay, Jons of fome of our most respectable citizens who have refided some years at an academy in France, and appear by their manners, information, and understanding, to do ample justice to the persons who have had the charge of their education in that polite and enlightened country. Captain Dunn and thele gentlemen, have travelled through the greater part of France, and have had the best opportunities of procuring, as well from their own particular objervation, as the convertation of others, the most authentic information of the prefent state of that kingdom.

By their accounts, the king had not figned the connitution—though it was univerfally believed he would toon meet the wifnes of his fellow-citizens, by giving is final fanction to this celebrated instrument. It was supposed, by many, that he would make no essentens composing the national soldiers. Profound tran- learned.

credibility of the authors of it, appears incontestible. Extract of a letter from Halifax, September 24. " A new act of parliament has lately passed, which the collector is possessed of, which admits of a free intercourse in American bottoms with all the British West India islands, and the collector says, he is also advised, the same privileges are to be permitted the

Americans here." PROVIDENCE, November 5. Cape-François.

Extract of a letter from a master of a wessel at Cape-Francois to his owners here, dated Ostober 10, received by captain Wheaton.

"From a scene of tumult, noise and disorder, have retired, to give you some information respecting your brig and cargo, which I greatly fear will go to destruction; the first by worms, the latter by the heat of the climate—and tis out of my power to prevent it. Were I to land my cargo, and proceed home with fait ballast, the vessel might be preserved, but I fear the cargo would periff, as leveral others have fince my ar-Should I remain here, both will be lost. Every possible exertion on my part, assisted by Mr. port. As a last effort, we have drawn up a memorial to, Mr. Bourne, our conful, requesting him to throw in a spirited remonstrance to the assembly, defiring them either to take our cargoes, as no one else will, or permir us to depart. This was done yesterday, but no answer has been given.

The fituation of the colony is more alarming now han ever. The negroes have advanced their camp within three miles of the French. We can see their colours displayed from our vessels, and they had the audacity, to take three grenadiers within half a mile of the French encampment, which is four miles from town. Vessels keep their sails bent, and some of the inhabitants fend their families on board every night."

PHILADELPHIA, November 12.

The number of burials in Kingston, Jamaica, last year, was 289-marriages 29-baptisms 266. This statement includes whites and blacks.

Now. 17. The unbounded advantages which will Tuesday last Captain Wheaton arrived here from flow to the public from opening the proposed canal between the waters of Delaware and Susquehanna rivers, by the space of a few miles between the Quitapahilla and Tolpehocken, have influenced the legislature to reward the undertakers with liberality, in order to infure its accomplishment; but, to prevent any monepoly in this advantageous, as well as useful business, they have improved upon the plan for receiving subscriptions in the national bank: Besides requiring public notice of the time and place of receiving subscriptions, for a confiderable length of time before, both in the English and German news-papers, they have directed that all subscriptions received for the first fifteen days after opening shall be on a footing; the surplus beyond the amount of shares in the corporation to be excluded in proportion. The notice aforesaid hath been given, and the subscription book will be opened in this city on the first of December, now at hand. Let none therefore, who wish to interest themselves in this valuable institution, complain, if after all these precautions they are thut out. In fuch case they will have to blame themselves only, for not having attended to their interest in due time, when they will have to give an advanced price for shares to entitle them to a participation of the annual profits.

Much has been faid about making the post-office the medium of news and information to the people; and it feems to be the general fentiment, that if it is practicable, this medium should be adopted for this truly patriotic purpole. It is, however, faid, that there are very great obstacles in the way-the expence is the most formidable-another is, that it will interfere with By the brig Theodofia, captain Lake, who failed that dispatch so necessary to give satisfaction to the the 23d ult. from Cape-François, and arrived here on mercantile interest, which is confidered as the great hal objections; but give it his full approbation, with Thursday last, we are informed, that three days pre- support of the post-office department, and whose connevelerved right of pardon in cases of treason or re- vious to his sailing, a body of troops marched from the venience and accommodation aught therefore to be pribellion, to fecure the friends of the monarchy, in its Cape to attack the negroes, who were embodied at marily confulted. With respect to the expence, it may old form, from the evils and penalties to which they Post Margarets also, that a French frigate sailed for be presumed, that if news-papers were particularly might otherwise be exposed.
