cumstance has taken place from religious prejudices, which has considerably allayed it. In the city of Prague there is a number of lews who principally inhabit that part try. called the Little Side. As in the ign of the emperor Joseph II. they obtained the prileges of citizens, and as the principles of toleration enly professed by Leopold II. did not permit them entertain the least uneafiness on the subject, they t themselves inclined to act like other citizens, to rove their attachment to our sovereign, who is likeife theirs; in consequence of which, they armed I formed themselves into companies, for the purofe of parading like the other corporations, on the ntrance of their imperial majesties. The catholics rould not suffer it. Both parties were irritated, and he quarrel rose to such a height that they fired on each other. On each side there were some killed and rounded. The interpolition of the garrison became ecessary, which was attended with much success. The wife precaution was adopted, of shutting up the Little Sde, and thereby cutting off, for the moment, Il communication between that quarter and the other art of the city. It is hoped that the ferment will ubfide: there is, however, but too much reason to ear for the conlequences.

The bishop was obliged to join his endeavours to those of the field marshal, to prevent the apprehended effects of the despair of Servians. The bishop assured them that the grand fignior would take them under his especial protection, and would insure them from all molestation; notwithstanding which, many of the inhabitants, as well as other Servians, have passed into Hungary, where the government has granted to them confiderable privileges.

P A R I S, September 21.

The municipality, as the first effort to aid their fellow-citizens in deriving the greatest possible advantage from the new constitution, have proposed the following questions:

industry, and encouraging in it the establishment of

manufactures of all kinds? 2. What are the best means, within the power of the municipality, of procuring for the capital all the advantages which it may hope from general commerce with respect to its situation, the number and character of its inhabitants, its connexion with the departments of the kingdom and with foreign nations.

For each of the two best papers on these questions, to be sent in before the first of February, they offer a 20ld medal, of 600 livres value, and for each of the four next a gold medal of 200 livres value.
