(XLVIIIth YEAR.)

(No. 2406.)

MARYLAND GAZETE

THURSDAY, JANUARY 10, 1703.

STAASBURG, October 4. WAX HB three hundred prisoners taken in the Palitinate, arrived here this day

The general's advance guards and regiment band of mulic, accompanied by an immense mob, preceded them. *X**X The Jacobins received them as brohers, making the air resound with the tune of Ca Ira erformed on the various instruments. The decree especting deserters, and other papers tending to seduce enemy's armies, were distributed to them in the rench and German languages. It is reported that the habitants of Spire and Mayence exclaimed, with a erfect good will, Vive la Nation.

ORober 16.

The van-guard of Dumourier's army is expected to we arrived yesterday at Valenciennes. The general hourly expected there. The three commissioners m the national convention, who set out on Satury last to go and establish order and tranquillity in ambray, have not yet been heard from.

FRANCFORT, October 10.

The rapid sensation of sear has seized all the princes speech, in which he said, the banks of the Rhine. The house of Baden has

October 11.

Some people are arrived from the army of general airtait, such as commissioners, suttlers, &c. They that the troops have undergone the greatest distress; at they were four days without eating; that at last ley killed and eat their horses, and that if a truce had ot been made, they must all have surrendered; out 6000 cavalry, which composed this army, not bove 400 will return; the rest are all killed, taken. the horses eat! The remains of general Clairtait's by have already passed the French frontier.

October 16.

The various successes of the French, in Germany d Savoy, occasions a good deal of consternation in is country, and government is afraid, lest patriotism. ould again raise its head. Dumourier's threat of king up his winter quarters at Brussels, occasions a odigious alarm, because the people here well know at it would be only a step to proceed thence to Holnd. Government consequently pursue vigorous meares against all those who are suspected of favouring triotic ideas, and the states of Holland have lately ued an order on this subject.

BRUSSELS, October 17.

We hear from the provinces of Namur and Luxemrg, that the army of their royal highnesses Monsieur the duke d'Artois, is disbanded, as well as that der the duke de Bourbon. The individuals of hich these armies were composed are in the greatest stress, wandering and dispersed, without knowing here to go, or what is to become of them; many ithout money; others felling their horses, watches, d even their cloaths. I have feen some with no her covering than a blanket. A great many have t only the shirt upon their backs, and are wading rough thick and thin with half a pair of shoes. All tele poor unfortunate men have got their discharges their pockets, and anxiously desire to return to their dive country. It is to be hoped that the French ill shew themselves a generous nation in this instance, troops. nd that their humanity will lead them to forgive a

we perished fince their entry into France.

fitting they voted the expulsion of Briffot, and ordered power. And it declares, through the medium of the his name to be erased from their minute book. What resident of France, those magistrates who have enmay be the end of the present schism, it is impossible couraged the divisions which are about to separate the to lay; but it is probable it will at least have the effect two nations, hitherto perpetual friends, responsible for to remove the obstacles which this body frequently all the events which shall succeed." throws in the way of the executive power, and prevent them from ever carrying their own purposes with such irresistible influence.

General Dumourier arrived here last night about ten o'clock.

The election of a mayor is closed-Petion was elected by a great majority.

M. Garat has accepted the office of minister of justice, but the intentions of Pache, who was elected successor to Roland, are not yet known.

It now clearly appears, the majority of the Jacobin club is the minority of the convention; and it is argued from this, that whatever may have been done in This title includes every thing, and if we must perish, the moment of violent contest between faction and faction, political matters are about to make a turn in republic!" favour of the moderate party.

OA. 16. General Dumourier took his departure from Paris, for the army, on Tuesday morning. He went on Sunday night to the Jacobins, and made a

" Citizens, brothers, and friends, you have begun ken flight. The prince of Linauge has arrived at a great epoch; you have torn to pieces the ancient anheim with all his baggage. The bishop of Spire history of France, which offered nothing but the ing was ushered in by the ringing of bells. s retired to Oldenwald and thence has taken the road picture of despotism. A new æra rises out of this re-Helbron, towards Newstadt. The commissary of volution, which electrisies our armies, and which has ovisions at Heidelberg has emptied the magazines in given them the necessary courage to repulse superior ste, on the news of the approach of the French. torce. We are not fatigued. Pain, milery and hunany French tamilies have taken refuge in the Olden- ger do not exhaust us; we are more courageous than ever. We shall render unto despots what they would have given us. Before the end of the month, I hope to have 60,000 men to attack kings, and to lave the people from flavery."

To which Danton, as president, made the following reply: " When Fayette, that vile eunuch of the revolution, took flight, you had already served the republic, by not despairing of its welfare; you rallied our brother; you atterwards preserved with address, the station that ruined the enemy; and you have deserved well of your country. A grand career is yet open to you; may the pikes of the people break the sceptre of kings! and may crowns fall before the red bonnet, with which the fociety honours you! Return afterwards, and live among us, and your name shall figure in the grandelt pages of our history."

So the die is cast, that the propaganda is to be car-

ried into Brabant.

OA. 20. A body of troops is gone to reinforce general Custine, who is expected yet to lay Coblentz under contribution.

The patriots treat with extreme levity the accession of Spain to the confederacy. The Spanish monarch certainly came to the determination only on the consideration of the duke of Brunswick reaching Paris. They now laugh at the dilemma in which he must Extract of a letter from Paterson, (N. J.) December find himself, observing, that they have got another fine royal fish, caught in the revolution net!

Geneva, October 3, 1792, the first year of the republic.

To this note the council made no reply, but published an address to the citizens at large, exposing the infamous conduct of the French, whose only object was plunder. The address concludes with these emphatic expressions:

"We shall have the assistance of all Switzerland, which is interested in our preservation, by its treaties, by its honour, and by the necessity it is under of defending its own possessions. Let us be united, let us be faithful to our oaths, let us be citizens of Geneva. let no reproach of cowardice fully the fast days of the

NEW-YORK, December 28.

Yesterday, in testimony of the heartfelt pleasure the citizens of this metropolis were inspired with, on hearing the triumphant successes which were attending the arms of our generous allies the French, the morn-

At four o'clock, a federal salute was fired from the battery—and every countenance seemed to speak joy at heart in the glorious event, that liberty should reign victorious over her proud, despotic invaders; and at the clear prospect that such monsters as kings, will foon be expelled from the face of the earth.

In the evening, the Tammany fociety, or Columbian Order, met at their wigwam to celebrate the day, and a number of toasts were drank, which we are unable to obtain for this day's paper. The wigwam was beautifully illuminated; and the monument dedicated to Columbus, was also illuminated, which attracted the attention of the citizens and of the fair.

Yesterday being St. John's day, it was celebrated by the different lodges in the city.

Those who but a day or two ago affirmed, that the -retreat of the duke of Brunswick's army was impossible, have now received undoubted information, that he had it perfectly in his power to cut the French army to pieces, and march directly to Paris, but that for reasons best known to himself, he chose to postpone both operations till next spring. The spring is, no doubt, a pleasant season for travelling, and may perhaps, be the best time of the year for cutting armies to pieces. His serene highness has proved, by experience, that the autumn is an excellent season for letting troops die of hunger and disease.
