BOSTON, August 1.

On Wednesday morning, about four o'clock, the melancholy cry of hre gra ed on the cars of our citizens. They immediately affembled to stop, it poinble, the ravages of the destructive element. The fire at Wyscasset from England, bringing an account of head as to render abortive all attempts to secure from termine whether the account deserves any credit. the flames, any of those elegant and valuable ropewalks, which formed a row from Mik-itreet, to the west part of Fort Hill; their attention, theretore, was turned to the preservation of the dwelling houses, which, from the intense heat arising from the burning tar and hemp, were taking fire in every direction, at the distance of several rods. In the commencement of the fire, there was very little wind from any point, but in a few moments it came on to blow very irein from the north, and so continued till the fiames were stopped by their arrival at the water side.

By this accident, many citizens, who by many years laborious industry had acquired a little property -in one instant, " in the twinkling of an eye," are reduced to poverty. But it is beyond a doubt, that the outstretched hand of liberality from every incividual will in part indemnify them; but this part can be but small. No actual calculation has been made; but almost every opinion is, that the loss of property by this fire, is far superior to the loss by the fire at the louth end.

It is with pleasure we acknowledge the exertions of our brethren from the country, which on this, as on many former occasions, were unremitted and highly serviceable. These circumitances will still falter bind the bonds of friendship, and do away ridiculous local. prejudices. From the towns of Cambridge, Charlestown, Washington, Brooklyn, Milton, and Roxbury, engines were lent.

From the New-York Diary of Saturday evening. REPORT OF THE DAY.

Captain Cochran is just returned to the Hook-and during his cruile he spoke a vessel bound from Barbadoes to St. Eustatia, from the captain of whom he got a Barbadoes paper, giving an account, that the British packet had arrived at that island the day before he sailed, and brought the Gazette account of the engagement between the British and French fleets, and that lord Howe had actually taken nine fail of the line!!

It is also rumoured, that six more of the French line of battle ships were totally crippled, and could not be towed away. That the junction between Clairfayt and the duke of York, had taken place; and a severe action had taken place filteen days after the duke's check, in which M. Pichegru left 17,000 men dead on the field, and got off himself with great difficulty.
