

ANNAPOLIS.

EUROPEAN AFFAIRS.

Several late arrivals have brought a variety of rumours of battles and diplomatic movements between the Belligerent powers, to which we have not paid attention, because in the first place our own concerns have been of higher moment, and in the next that the European have had nothing of authenticity or serious interest in them.

An arrival at New York brings a London account of the 24th May, gives the rumour of a battle being fought somewhere between 185,000 Russians, and 200,000 French, and that the Russians had a reserve of 20,000 in Lithuania—that the battle terminated like the battle of Eylau, without any decisive advantage to the French.

Such being the outline of the news, every intelligent person must see in it, the hand of a bungler—and that it is totally destitute of credibility on its face.

The position of the hostile armies no doubt affords just reason to expect a very severe and sanguinary conflict; the tongue of rumour will therefore be busy in anticipating events which are so interesting and impending. [Aurora.]

From the Norfolk Herald of the 9th instant.

One of the 74's and a frigate, which have been for a few days past lying in Hampton Roads, sailed yesterday, and came to anchor off Cape Henry.

Orders have been issued from the war office to the governors of the several States, making a requisition of one hundred thousand MILITIA, to be ready to take the field at a moment's warning, and authorizing the acceptance of volunteers.

The quota to be furnished by the State of Maryland agreeable to the above order is 5833 men, to be embodied immediately.

The Chevalier de Toromada on Monday presented his credentials as charge des affaires from his Catholic Majesty to the United States, succeeding to the diplomatic function of the Marquis Yrujo, and was afterwards in that character received by the president.

Mr. Lema, attached to the legation, was also presented to the president. [Nat. Int.]

A duel took place a short time since, near New Orleans, between governor Claiborne and Mr. D. Clark; the governor was shot through the thigh.

Arrived at Charleston, June 20, Sch'r Adventure, Alexander, 18 days from Barbadoes.

Admiral Cochrane, with his fleet, consisting of 4 74's, 3 frigates, and 5 sloops of war, were lying at Barbadoes when capt. Alexander sailed. No French fleet had arrived in any part of the West-Indies.

Patent Sails.

A person in England has obtained a patent for making vessels sails in a new manner. The principal difference between the new and old mode we believe is, that in the new the sails are made with the canvas crosswise. It is said they last longer, reef better, and stand better upon a wind.

An experiment was yesterday completed of constructing a bow-form'd main topmast, for a 74 gun ship, on Mr. George Smart's new principles, which at length is about to be tried in his Majesty's navy. [London Paper, May 8.]

An article dated Augsburg, (Germany), under date of the 3d of May, says, "the 16th regiment has marched here from Brescia. Among them is the sharp shooter who shot lord Nelson. The man is now a sergeant and member of the legion of honour."

French papers say the Seahorse British frigate has been captured in the Mediterranean by a French squadron from Toulon, and carried into Corsica.

NORFOLK, July 9.

MILITARY MOVEMENTS.

On Saturday evening the 54th regiment, after a few moments notice, paraded, when general orders were read, directing this corps to be prepared for actual service, and ready to march at a moment's warning; this regiment is composed of 13 companies, viz. one complete troop of horse, two companies of artillery, two of light infantry, and eight of the line.

Early on Monday morning the 7th regiment, 800 strong, paraded at Portsmouth—and on Tuesday the 94th regiment, 750 strong paraded at the marine hospital, and received general orders to be prepared for actual service, and to march at a moment's notice.

Every spark of manly indignation is kindled in the bosoms of our warriors—they are prepared and determined on revenge—the blood of our countrymen is spilt, and the people, so long deluded with expectation of British justice, have their arms in their hands, the sword is drawn, never to be sheathed, until they can abate the manes of their countrymen. This discovers a spirit becoming an injured people—and is the language held by all at the late musters—it was with reluctance the militia retired to their peaceable homes to await the event of further orders.

IN CHANCERY, JUNE 29, 1807.

John Robertson,

Catharine Elgin, Mary Elgin, Anne Elgin and William Elgin, heirs at law of William Elgin.

THE object of the bill in this cause is to obtain a decree for the sale of the real estate of William Elgin, deceased, for the payment of his debts, on the ground that the personal estate is insufficient for that purpose; the bill also states that the defendants all reside out of the State of Maryland.

It is thereupon adjudged and ordered, that the complainant, by causing a copy of this order to be inserted three successive weeks in the Maryland Gazette before the 24th day of July next, give notice to the absent defendants of this application, and of the substance and object of the bill, that they may be warned to appear here in person, or by a solicitor of this court, on or before the 24th day of November next, to shew cause, if any they have, wherefore a decree should not be passed as prayed.

Family Medicine.

Just received from RICHARD LEE and SON, and for Sale by

Gideon White, Church-street, An Assortment of PATENT MEDICINE.

For the prevention and cure of bilious and malignant fevers, is recommended

Lee's Anti-Bilious Pills.

Each article has on the outside wrapper, the signature of

RICHARD LEE and SON.

Without which, none are genuine.

Prepared by Richard Lee and Son, Baltimore. PERSONS wishing to purchase this valuable medicine, are requested to be particular in inquiring for Lee's anti-bilious pills, put up in wooden boxes having on the outside wrapper the signature Richard Lee and Son—this is necessary, as there are other pills of the same name.

THE operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile, and prevent its morbid secretions—to restore and amend the appetite—produce a free perspiration, and thereby prevent colds, which are often of fatal consequences—a dose never fails to remove a cold, if taken on its first appearance. They are celebrated for removing habitual coliciveness—sickness at the stomach and severe headach—and ought to be taken by all persons on a change of climate.

They have been found remarkable efficacious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Messrs. Richard Lee and Son.

The high opinion I have of your bilious pills, and a desire to make known their utility for the benefit of mankind, I wish you to publish the following:

For two months past, I have been afflicted with a violent sickness at the stomach, an inclination to vomit, and a loss of appetite—by taking two doses of your pills, I am restored to a perfect state of health—which induced my wife to try them also, which was attended with the same good effects, being now able to attend to her domestic concerns: in my opinion, this medicine is unequalled in stomach and bowel complaints, not being attended with that griping pain, common to other remedies.
