From the 7th to the 21st of this month the comet has described an arch of 15 degrees. Its orbit is inclined to the ecliptic at nearly an angle of 64 degrees. From the 7th to the 11th of September, it passed over 3 deg. 20 min. at the rate of 50 min. in 24 hours. At present, it moves with the velocity of 1 deg. 15 min. 24 hours, having increased in its velocity by 25 minutes, or by one half of its velocity when first observed. From this circumstance we may infer that the course of the present comet lies between the earth and the sun. Sir Isaac Newton says, in this system of the world—All the comets which move in a direct course, according to the order of the signs, about the end of their appearance become more than ordinarily slow if the earth is between them and the sun; and more than ordinarily swift, if the earth is approaching to a heliocentric opposition with them. Whereas, on the other hand; those which move against the order of the signs, towards the end of their appearance, appear swifter than they ought to be, if the earth is between them and the sun; and slower, and perhaps retrograde, if the earth is in the other side of its orbit. The present comet moves according to the order of the signs, and as its velocity is upon the increase it not only approaches the earth, but is probably nearer the sun than the earth.

**CURE FOR THE TOOTH-ACHE.**  
An eminent apothecary in the vicinity of London, has lately recommended, as an effectual cure for the tooth-ache, the following remedy, which he has been in the habit of using for many years, and out of the number of cases, eight tenths have succeeded. Take three table spoons full of brandy, and add one drachm of camphor, with thirty or forty drops of laudatum, drop a little upon some lint and apply it to the tooth affected, keeping the lint moistened for five minutes only on the tooth and gum.

**BALLOON.**  
Mad. Blanchard, in one of her late ascents from Paris, in a balloon, was caught in a storm of hail and rain; but notwithstanding ascended so high, that she was lost in clouds of whirlwinds, and did not alight from her balloon near Vincennes till between 6 and 7 in the morning the day after she arose from Paris. In consequence of the prodigious height the balloon ascended, Mad. Blanchard fainted, and continued insensible for some time. Her ascension occupied 14 hours and an half.

From a Pittsburg, (Penn.) paper of Sept. 20.  
Arrived in town on Sunday evening last, from Michillmackinack, a delegation of Ottawa Indians under the charge of Doctor Le Baron, late of that place. The great Ottawa chief, the Bassard, is among the number. They are going to Washington to see the President of the United States. Their particular object if any, is unknown. They appeared much gratified and astonished in viewing the numerous manufactories of this place.
