Thomas, Ordered, That the Honourable the Executive Council be requested to lay before this House the Journal of the proceedings of their body from the year 1800 up to the present

date, inclusive. The order relative to the printing of the House of Delegates was read the second time and adopted.

The clerk of the senate delivers the following communication from the executive:
IN COUNCIL,

Annapolis, Dec. 8th.

IN virtue of a resoive of the General Assembly, at its May session, the Treasurer was directed to borrow 307,000 dollars; the terms upon which the loan was effected, will appear by the report of the Treasurer. As soon as the money was obtained, steps were taken to procure arms, ordnance, and military stores for the State, and considerable purchases were made; but owing to the interruption of intercourse between the States, they could not all be received in time to be sent to those parts of Maryland which are

most exposed to danger. Soon after the adjournment of the Legislature an order was passed for a return of the public records and papers to the seat of government; but in consequence of the approach of a considerable naval force of the enemy, it was found necessary again to order their removal, and they were sent to the town of Upper-Marlborough. It has been deemed expedient to direct, from time to time, a return of such of them, as were necessary for the purpose of holding the Courts; but the Board has pasced no order for the removal of the rest, and it is submitted to the Legislature what shall be done in regard to them. It is certainly very much to be desired, that the offices should be kept open for the transaction of business; but, besides the difficulty of removing the records er of the house of delegates (to be from the seat of government in time, vital importance, or can have a more

whenever the appearance of the ene- | imperative claim to its attention .my may require it, there is considerable danger of their being lost or destroyed by frequent removals-The Legislature will see the necessity of making some further provision with respect to them. The resolution of the last session does not make it the duty of the officers to open their offices at the place to which their records are removed, and by confining the authority thereby conferred upon the Executive to two counties, it has been found impracticable to procure the necessary accommodations for the officers.

The attention of the Legislature

will of course be directed to the militia Bystem; in its present state it is almost a dead letter, and without power to compel the service of those who, on any sudden emergency, are unwilling to assist in the defence of the country. It is not, and cannot be expected, that while those who understand the defects of the system contrive to avoid the service, others will engage in it with cheerfulness, and consent to bear an undue proportion of its burthen and sufferings. It was not designed by the wise framers of the constitution to leave it to each member of the union to defend itself, and after having surrendered to the General Government the most material sources of revenue, it is impracticable for the individual States to bear the burthen of any extensive system of defence-It was, therefore, expressly provided, that the United States should protect each individual State against invasion,; and the militia, or other force of the latter, was designed to be employed only on sudden en mergencies, and until the national Government should come to its relief. If the expenses of a war waged by the national authorities, are to be borne by the States, it is not difficult to foresee, that the State Treasury will be soon exhausted, and the annihilation of the State Governments must follow. We had an unquestionable right to expect, that in a war declared by ourselves, the nation would have promptly afforded to us the protection which the constitution has so solemnly guaranteed to every member of the Union. Instead of this, however, we have to deplore the ravages and distresses which have been produced in different parts of Maryland, by the incursions of the enemy, and that its most exposed places have been left in a defenceless and unprotected situation. Thus abandoned by the national authority, and without any well founded prospect of a speedy termination of the present disastrous war, it is for the wisdom of the Legislature to devise the means of detence, which, upon any future invasion, the State authorities shall afford. We must again be permitted the Baltimore road to Stephen Rig. the act to incorporate a company for to recommend to the Legislature the don's; also a petition from sundry the purpose of cutting and making a organization of Volunteer Corps of inhabitants of said county, praying canal between the River Delaware Infantry, (to be mounted) and which a public road from the road leading and the Chesapeake Bay," and of would at this time be found the most efficient force for the kind of warfare in which we are engaged. In some places, threatened with invasion, this species of force has been resorted to, under an idea that it was authorised, and because found capable of affording the most service; the payrolls of those men, when presented to us, we have been under the necessity of rejedling, becausethe legislature had refused its sanction to their organization.

We would also call the attention of the Legislature to those clauses of the Militia Law, which establish the rules and articles of War for the government of the Militia, while in actual service; we do not mean to question the propriety of such rigorous rules for the government of a regular army, nor do we mean to say that the Militia, while in service, ought to be subject to no regulation, but we persuade ourselves, that the Legislature can devise rules for the government of the Militia, without depriving them of any of the essential privileges of Freemen, and subjeding them, for offences undefined, to the most cruel and opprobleus

We take the liberty also of submitting to the Legislature the pro-priety of adopting a system of general education; no subject, upon which its wisdom tan be employed, is of more

Governments, like those under which we have the happiness to live, depend for their existence and prosperity-upon the intelligence and virtue of its citizens; and to place the means of education within the reach of every description of the people, ought to be the primary concern, as it is the unquestionable duty, of the Legislature of every free state. It is one among the many causes which we have for deploring the present war, that it diminishes those resources, which ought to be employed in the education of our youth; we still, however, think, that if, in the opinion of the Legislature, funds can be spared for the purpose, the work should be commenced, and a system matured for the establishment of schools in every part of the state.
The amount of claims for pay and

in the course of last summer, already sanctioned by this department, exceeds one hundred and six thousand dollars; a more particular account cannot, at this time, be given, as the board is still acting upon those claims, and many of them are yet to

For the purchase of arms and military stores, orders have been drawn to the amount of sixty-nine thousand six hundred and seventy-five dollars, but a considerable sum is yet que on this account. We have the honour to be,
