> New-YORK, Nov. 12. Arrival of Com. Decutur.

With great pleasure we announce he arrival at Sandy Hook, the U. S. frigate Guerrier, Com. Decatur from the Mediterranean, with part of the squadron under his command. amongst which is the U. S. sloop of war Enterprize. We learn from the pilot boat Rambler, that part of the squadron has gone to Newport.

LATEST FROM FRANCE. The fast sailing brig Georgia Capt. Smith, arrived at this port this day, in 42 days from La Ro-

chelle from whence she sailed on the 20th Sept. By this arrival the Editors of the

Mercantile Advertiser have received a file of Paris papers to the 23d Sept. which do not, however, contain any news of importance. If. upon a more minute perusal they should be found to contain any articles of moment, they shall and in our next paper.

ANOTHER CREEK WAR.

The requisition by Gen. Gains, on the Gov. of Georgia, for two thousand militia, combined with other circumstance which have come to our knowledge, induces a belief that the Creek are fully determined to wage another war. In this hopeless Contest, it is more than probable that they will again suffer most severely and be driven to the necessity of buying prace by a further telinquishment of territory. The total exterinination of the miserable race cannot be very

[From the Boston Gazette, Oct. 29] WONDERFUL PHENOME-NON.

We copy the following singular article from the New-York Courier of Monday last, as it will furnish much food for the conjectures of our Philosophers; and we add thereto a few particulars which we have obtained in conversation with a very respectable gentleman from the vicinity of the scene of the Phenomenon:

"We have conversed with several gentlemen, of undoubted veracity, from the county of Uister, in this state, who all agree in the following very extraordinary relation.

That they have conversed with several credible persons from Marbletown, in that county, and they mention the names of persons well known to theeditor of this paper; and these persons assert, and declare, themselves ready to make oath, that the stones lying in two fields there, on several successive days, rose from the ground, to the height of three or four feet, and moved along, slowly & horizontally, from thirty to sixty feet, and that a few of them even mounted over the tops of trees! That the persons, who first saw these astonishing performances, were disbelieved by the neighbourhood; but all those, who came to see if there was any truth in the accounts, are prepared to swear to them. The last performance was in an open field, without wood or cover near it."

The Revd. Mr. Lawsing informs is, that he had information from a very respectable source, that the Revd. Mr. Gozman, of Kingston, had been very actively engaged in obtaining all the known particulars" of this Phenomenon, and from the unimpeachable character for integrity which these gentlemen and most of the witneses sustain, his opinion is that the facts, however extraor-drary in their natural ought not to be doubted. He und stood that one of the large crays stones was moved 125 yards from the spot where it had been half bedded in the earth, and was checked in its rolling, after it had struck the ground, by one of the persons present, but whether the stone was warm, or what was its weight, he did not understand-but his impression was that it weighed from 6 to 9 lbs. That the atones were mov-ed in all directions; that the Phenomenon first took place (or was witnessed) on the Tuesday or Wednesday following the great storm of Sameday 23d Septemben, and re-

days, about the same hour, in the presence of hundreds of speciators; that the weather was fine and clear no sulphurous smell perceived at any time; nor was there any trembling of or noise in the carth.

At is not our object now to make any particular comments on this Phenomenon-we would only remark that, doubtless there were various Phenomenon in other places about the time of the tempest of 23d Sept. and it is hoped that those who may be in possession of remarkable facts will not continue to withhold them from the public. A knowledge of the constitution and economy of Nature, is of greater importance than is generally conceived of. It has already been stated that during the late tempest, one side of a bridge of a single arch, built of heavy stone, in Montville (Con.) gave away, not from the fect of water, there being but little, and that a stone weigh stream a rod in a direct live. Charleston, Nov. 3. FROM GIBRALTAR.

The ship Ceres, Capt. Callender, arrives here this morning, in 42 days from Gibraltar. By her we learn, that our squadron were to rendezvous at Malaga, on the 15th September, but nothing was said of their returting home. Capt. C. heard nothing of the U. S. brig Epervier after she left the streights. Left none of our squadron at Gibraltar; two brigs and a schr. had touched there while the Geres was in port, but had sailed agair. The British officers expressed surprize at our vessels of war not stopping at Gibraltar more frequently. One of their frigates had tallen in with the U. S. 74 gun ship Independence, in the Mediterranean, which they took for a frigate, and did not dis cover be difference ill after being some time in company. The com-manding officer remarked at Gibraltar, that had the circumstance hap pened during the war, he should have fallen an easy prey to he The terms of the Peace dictated to Algiers by commodore Decatur, were not generally known at Gibraltar, but the presumption was, that they were highly creditable to us.

FROM THE MEDIT TRRANE.

FROM THE MEDIT RRANE-AN.

Capt. Hullard, who arrived yesterday from Malagar informs that the U.S. ship Independence, Com. Bainbridge, frigate Congress, Capt. Morris and schr. —, arrived there about a week privious to his sailing. Com. B. immediately despatched the schr. for Com. Decatur, who was inderstood to be at Carthagena. On the junction of the two squadrons, they were to proceed for home; and it was said were to ome to Boston. They may therefore, be daily expected. Capt. He brought despatches for Capt. He brought despatches for the Sectionary of the Navy from Com. Brinbridge.

The J. S. brig Enterprize, Jent. Kearney, had arrived at Augga, via Goraltar, where she put in, carried away her top-mast. J. S. brigs Saranac, Chippawa loxer, were also at Malaga. A 6. hermaphrodite brig sailed in pany with Capt. H .- Com. Inbridge's squadron interchanged lutes with the Spanish forts on reiving at Malaga, and the Governor of the Province, the American Consul, and several other distin guished persons, had dined on board the Independence.

RURAL ECONOMY.
Succ your Gorn Cobs.—Beat Corn
Cobs fine, build hem, soft, in water,

occured the two or three following add a little meal, hunks or branwith salt sufficient to make it palatable; and when end give to your cows: It will make them thrifty, and they will produce abundance of milk through the winter, If a lite tle corn be bear with the gobs and boiled, the sale and hours may be omitted-Severat years experience has proved this to be an economical and good method. Would not Farmers therefore do well to save their corn cobs? As provender for caltle will be scarce the ensuing winter. I earnestly recommend the above for a trial. A machine, similar to that with which tanners grind their bark, might be constructed, that would grind a large quantity of Corn and Cots in a short time. The expense would be trifling, compared with the utility. PRESTON PEARSON. Wake County, North Carolina, Oct. 2.
