New York, Feb. 7. The African Expedition, consisting of the US. shis Cyane, and the snip Elizabeth, sailed from this port yesterday afternoon. The Elizabeth, chartered by government, proceeds to the western coast of Africa, for the purpose of carrying into effect the act of 1819, agreeably to the views of the President, as expressed in his late message on that subject; she carries out the U. S. agents and . rtisans, mechanics and labourers, for the purpose of negotiating with the local authorities of the country, for permission to land and provide for recaptured or liberated Africans; and to build houses and cultivate the land for their use-About 50 adults, people of colour, go out as mechanics and labourers, provided with utensils, tools, implements, & cores. Those whose services are valuable on account of their trades, and who could not be prevailed on otherwise to go, are permitted to take their families with them. This Expedition we are informed, has no direct or necessary connection with Colonization. The Colonization Society, it is understood, will soon send a vessel out from the south with colonists. The United States takes no part in the affair of Colonization. But if its operations for liberated Africans are carried on in the same place where the Colonization Society conducts its colony, a mutual help will necessarily be felt by each others efforts. These two communities ought not to be connected in the public mind, as they are not in fact; yet they may be viewed as two individuals carrying on, each its benevolent purpose, upon the same theatre of action.

The bill for the benefit of Mary Wells o Anne Arundel, was referred to the next general assembly, and the supplement to the actto preventives negroes from selling corn, wheat or tobacco without licence for that

purpose was rejected.

The house proceeded to the second reading cithe order relative to auction duties, and on motion Mr. Montgome, y, that the following be received as a substitute, to wit Whereas from the official reports of the treasurer, and the report of the committee

of ways and means predicated thereon, and from information derived from the state's a-gent alluded to in their report of the said committee, it appears that in the event of the receipt from the government of a portion of the state's claim, the whole of the loans of the state reimbursable in the year 1820 and the current expenses of the year, together with the amoun of the journals in 1821, can be discharged, and leave a balance in the trea sury, and in the event of the receipt of no pat of the state's claim against the general government, yet the receipts in the treasury with the balance of spec c therein, will enable the state to discharge as well the cur-rent expences of the year and the journal of the next session, as one moiety of said loans, and leave a balance in the treasury. And whereas the city of Baltimore under their charter to licence and regulate auctions, and by the ordinance passed in conformity thereto, have since the passing of said ordin ance received a fund of one per cent on goods sold at public auction, which fund has been faithfully applied and expended, and still continues to be so applied in clean ing and deepening the basin, a measure not only of immense importance to the city, but to the state at large—and whereas the city of Baltimore is burthened with a debt including the war debt to the amount of near ly half a million of dollars, and is truggling ficulties, and unprecedented pre-sure of the times, and has recently experienced a most affecting visitation of providence, and where as the state of the treasury does not require a direct tax on the assessable property of the state, and the annual receipts will meet the current expences, therefore, ordered by this house as an expression of their opinion that it is inexpedient to pass a law (and so the house have decided) directly or indirect ly diminishing or taking away this source o revenue from the city of Baltimore, and tha the governor and council be requested to publish the aforegoing in the several news-papers at Easton, Frederick, Hager's town,

The Macedonian Frigate.

From the National Intelligencer. Letters have been received from the Macedonian, dated Valparaiso, October 12th, 1819, from which we learn that she sailed on the 25th of April; from that port for the coast of Mexico, and in consequence of a request on the part of the Chilian government, passed the port of Li-

coast and anchored at Africa, for a few hours, and thence proceeded off the port of Lima, where he fell in with the Chilian brig of war Galvarino, the only vessel then blockad. ing the port. She was commanded by a Lieutenant of the British Navy, who stated that it was not the intention of the admiral to enforce the blockade of Peru to the extent embraced by the proclamation. It appears that Lord Cochrane is carrying on the same kind of warfare on the coast of Peru, as was waged against the planters on the shores of the Chesapeake, during the late war. He had taken and plundered Payta, and several plantations on the coast, of sugar, rum and household furniture. The commander of the Galvarino, in proof of his assertion respecting the intention of the admiral, stated, that several A-American vessels had sailed in and out of the port of Payta which they did not even speak, and that several others were trading at other ports on the coast, to wit: the brig Maced nian, at Guarmey, the Beaver. Truxillo, and the ship Two Catharines, at Guyaquil. To ascertain whether any of these ships had been molested by the admiral, captain Downs proceeded to Guarmey, where he arrived the day after the sailing of the brig Macedonian .-He there found the British brig Columbia, (formerly the US. brig Nautilus) and the French brig Gazel, & was informed that out of the latter, the admiral had taken \$60,000 in specie, and that he had landed and intercepted on the road from Lima to Guarmey, 40,000 dollars, which the Spanish merchant who had purchased the cargo of the Macedonian, was sending on board her, where he was bound by contract to deliver it. Captain Smith gave to Lord Cochrane a certificate that the money did not belong to him, on which certificate, contract, and other do-

cuments as proof, the money was condemned.

From Guarmey, Captain Downs, proceeded to Truxillo, but saw nothing of the Beaver, and thence to Guyaquil, in search of the Two Catharines, for the purpose of offering her convoy, but she had sailed for St. Blus several days before. At Guyaquil the Macedonian received from the governor great civility.

After refreshing at Guyaquil, the Macedonian sailed for St. Blas, where she arrived on the 20th July, and found the Two Catharines. During her stay at St. Blas they

were visited every night by severe lightning, in which the Two Catharines suffered severely, and to the assistance rendered by Capi. Downs mao be attributed the salvation of the ship. The subjoined letter from the cantain of the Two Catharines to Captain Downs, shows the extent of the obligation he felt himself under to that officer.

From St. Blas Captain Downs proceeded to Accapulco, where she took in water and refreshments, and returned to Valparaiso.

It was expected that the Macedonian would sail in a few days for the Gulf of California, running down the coast of Chili and Peru, and touching at Panama, as well with a view to ascertain the intentions of Lord Cochrane as regards our commerce, as to afford such assistance and protection as might be required by any American ships he may fall in with. On the return of the Macedonian to Valparaiso, she there found the British commodore, where he had been laying 6 months, without lifting his anchor. Lieut. Tatnall, of the Macedonian, had an affair with an Englishman, at Valparaiso, and shot him through the

The port of Lima being at the time blockaded by the naval forces of the part of the commanding officer of the British forces in that sea, that captain Downs should first attempt to force the blockade (added to having no business there which required he should do so) this discrete conduct must command our approbation.
