The apprehension of a second visit from wild beasts obliged me to keep my station in the trees for some time, till fancying I heard the sound of bugles from the camp, I descended, took my pistols and saddle with me, and proceeded in the direction I judged the sound came from. Hope, ever flattering, led me first in one direction, then in another, during the whole night, till despair at last took possession of my breast; I fired both my pistols at 2 o'clock in the morning, for signals, but without effect. Exhausted with fatigue, I threw down my saddle and again took shelter under a thicket. In this dilemma, I- fervently invoked the Almighty for protection, for I felt that without His aid I must inevitably perish .-At day break a gleam of hope dawned on me, and eagerly did I seek to discover in the features of the country some point to which I might direct my steps. Fruitless as my endeavours were the preceding night, so were they on the succeeding morning. I rose from my concealment in the utmost anguish of mind; ere I had paced a dozen yards a tremendous large lion presented himself to my view, couchant under a bush; I passed within a yard of his tail, so immediately did I come upon him; but he stirred not, and if he saw me, was regardless of his prey. Never rose the sun more majestically grand than on this eventiul day. O God! it was then I acknowledged thy power supreme! Placing myself under the Almighty's protection, I bent my steps, as it were by instinct, in a direction which prought me to a river. Here I paused on the banks to reflect on my condition. The alternative presented was, either to follow its course, which might bring me to a known point, whence I might enter the colony, or else to remain where I was with the expectation of being picked up by a party sent from the camp in search of me. The former offered so many obstacles that I gave up the idea as totally impracticable in such a country and without food, the latter I embraced, though had I possessed my pistol loaded at the time, my state of mind was such that its distraction might have driven me to the rashest and basest of acts. Four hours elapsed in this state: I saw Caffres in every direction, but Providence screened me from their view; I became faint for want of food, which had not entered my lips for 36 hours, and was so lacerated with thorns, &c. that I began to think of a future state as near at hand. Towards mid day however I was roused by the sound of bugles; I listened and found it was not imaginary as before, but at a great distance. How to make myself heard I knew not; and having lost my horse I could not proceed with any dispatch towards the sound. I threw away the incumbrance of my pistols, and a part of

fidence and spirits. After two hours, after a long and patient of tould make myself heard—was at 4 o'clock, with direction was answered; and at length discovered by a party, which had all night been morning. Just as Unipper morning. Just as Unipper morning going to press; the jury going up the pursuit. You may fourt with a verdict for the pursuit judge my joy was unbounded.

LATE FROM FRANCE.

We have been politely favoured with Paris papers, to March 1st. by the beautiful, fast sailing ship Repeater, captain Young, which arrived last evening from Havre, in the very short passage of 36 days. They contain no late intelligence of importance, from Europe, and little of interest, except extrac's which will be found below. They are filled with details of the late assassination plot in England, which seem for the moment, to have excluded every subject else. There had been no late arrivals from the U. States, at Havre, when captain Young sail-Telegraph.

A desirable farm for sale. Will be sold at public sale on Monday the 22d day of May (if fair, if not the next fair day) on the premises, the farm lying in South River neck, on which the subscriber now resides. The farm bounds on the navigable waters of South and Rhode rivers, which furnish an abundance of wild fowl and fish of every discription. The soil is susceptible of great improve ment by the application of plaister, and is well adapted to the cultivation of tobacco and grain; there is on this farm a large and productive orchard. The improvements consist of a small dwelling house and kitchen, a tobacco house and granary. The terms of sale, which will be accommodating, will be made known on the day of sale. The purchaser if desirous can have immediate possession by taking at a reasonable value the stock and crop now on the farm. Persons desirous of purchasing are invited to call and view the premises before the day of sale.
