In addition to the above circumstance, it is worthy of remark that, although for ten years past, the elections have generally been warmly contested in this county, and that during a considerable fact; the judges refused to take part of that period our manufactories of iron, of cotton and wool, were in active operation, (whereas at present owing to the depressed situation of our country they are all nearly idle.) and large bridges and other public works were going on; still, notwithstanding the most sickly season that has been known for twenty years, near, or quite one hundred more votes were taken than have over before been received, or than (as your memorialists believe,)
