IMPORTANTLAW INTELLIGENCE A question has for some days part been pending before the District Judge of this District, which has excited very great attention among the dealers of stocks and ex change, and generally in the commercial community, from the extent and novelty of the principles, which were understood to have been assumed in the case.

A debtor of the United States Bank was

possessed of a certificate of stock in his own name to a large amount, and on the day the notes became due, he having failed, day the notes became due, he having failed, the bank filed a hill in equity and prayed that an injunction might issue to restrain any transfer until a decree should be made on the claims set forth in the bill. The declared object was to appropriate the stock in question to the payment of the notes due the United States bank.

The claim was resisted by the debtor -The claim was resisted by the debtor — On Saturday last the District attorney, Mr. Blake addressed the court in support of the bank, and the counsel of the opposite party, J. T. Austin, Esq was to have been heard yesterday, to which time the court stood adjourned. It appeared by the answer of the respondent that the property in stood adjourned It appeared by the answer of the respondent that the property in question was in fact holden by him as truster, under a decreetal order of the Circuit Court, and that the claim of the bank was resisted by him for this reason, among others that the trust property, although no

there that the trust property, although nominally standing in his own name, was not
legally liable for his private debts.

At the opening of the court yesterdaythe person for whom the respondent was
trustee appeared by Daniel Webster and S.
K. Williams. Esquires, as counsel, and by
a supplemental bill claimed the funds in
question as part of hotrustfund. Whereupon by consent and without argument, the
District Judge dismissed the petition of the
United States bank and decreed on this lat
ter claim that the stock should not betrans ter claim that the stock should not betrans ferred until the next term of the Circuit Court of the United States.

The general question therefore, about which so much interest has been excited, was not discussed and has received no decision—but we understand that some other claims of a similar terms. claims of a similar nature are about being brought forward, in which these important principles will necessarily receive the at tention of the court. [Patriot,

ARCHITECTONIC PROFESSOR.

SHIR.

Alleghany College, founded at Meadville, in Crawford county, in 1815, by a few enterprising individuals, has been favoured with a patronage, mostly from abroad, wor thy of grateful recollection. By the munificence of Bently, Thomas, Winthrop, many booksellers, and others, its library is supposed to be but the second in point of value, belonging to any of the forty nine collegiate institutions in the United States Many donations of various kinds have been collegiate institutions in the United States Many donations of various kinds have been made to this college by individuals, and seven thousand dollars have been appropriated by the legislature of this commonwealth;

yet its professorships are not endowed.

Not a few of its most act ve, persevering, and liberal friends in the vicinity of its loca-Not a few of its most act ve, persevering, and liberal friends in the vicinity of its location, and in a distant sister state, are members of the masonic fraternity. Western Star Lodge, No 146, at Meadville, has conceived the design, and, with a liberality worthy of the craft, has commenced a subscription, in which sister lodges are promptly and cordially uniting, for the purpose of endowing a professorship in that college. The object is to raise a sufficient sum, the interest only of which is to be an.

Capt. Wyatt prosum, the interest only of which is to be appropriated from year to year, for the support of a learned mathematical professor, except such part as may be deemed neces-sary for purchasing a suitable apparatus. It is well known that the enlightened brethren of the ancient and honourable fraternity have ever considered it a duty, according to their arowed principles, to promote, as far as in their power, a knowledge of the arts and sciences calculated to benefit the world,

and sciences calculated to benefit the world, and that whatever is ranked under the name of mathematics has, time immemorial, elaimed their fostering care.

The Western Star Lodge has recently issued a letter addressed to all the lodges in Pennsylvania, respectfully inviting their brethren to co operate in an object tending to scatter the light of important science in the regions of the west. The object accomplished, it is to be hoped that undue prejudices against a society in the records complished, it is to be hoped that undue prejudices against a society in the records of which are multitudes, not easily numbered, of the molecularied, pious, and excellent of the earth will subside; that this enterprise may profus public demonstration of the christian betwolence and patriotism, which, unknown to the world, adorn and dignify and ennoble every genuine masonic heart; and that it may stand a monument to the honour of the craft more durable than pillars of brick or brass.

The President of Allerhany College has

to the honour of the eraft more durable than pillars of brick or brass.

The climate here is not to the honour of the eraft more durable than pillars of brick or brass.

The President of Alleghany College has been deputed to visit the lodges, or at least as many members of gvery lodge in the state as may be practicable, to give explanations, obtain tuberfullons, collect money, and to make arrangements for these purposes of gvery prevalent. From the limitorary habits, diseases of gvery prevalent. From the his, remittent fevers are not his, those of a high grade sir. There is a very constituted to pass the fellowing Resolutions:

SIGNS AND TOKENS.

The people of Read were a few years ago thrown into compiler ble uneasiness, by certain strange signs and tokens with which their bread came impressed to them from the oven One old lady could distinctly trace at the bottom of a loaf which she received, the butlines of a death's head and cross bones, and was so shocked at what she imagined is be a most appalling omen, hat she immediately took to her bed. Another person in the bloom of life and health, saw imprinted is most legible characters, "Died son in the bloom of his and nearin, saw his printed is most legible characters, "Died 20th of Saptember," and concluded that 20th of Saptember, and concluded that fate had taken this mode of warning her to

the day which was appointed unto her to die. The bread of a third was marked in die. The bread of a third was marked in large, but not bold letters; with the words "Resugam." The amazed purchaser showed the loaf to an ingenious neighbour, who discarded the idea of any supernatural agency, and thought that the word might be a harmless device of the baker's to intimate a harmless device of the baker's to intimate his wish that bread might rise in price. The wish of the whole parish were set at work to account for these marvellous appearances; and the enquiry which ensued, led to the following simple, though certainly not very creditable solution of the mystery:

It appeared that in consequence of some alterations in St Gilles' church-yard, several large flat tumbstones had become times.

ral large flat tumbstones had become super fluous articles, since the persons over whom they had been placed had sunk into the narthey had been placed had sunk into the narrow house at so distant a period, that no friend lived to iasist on the de d retaining the little privilege of that scurptured Hic jacet, which duty or affection contributed to their memory. It happened that the church warden for the time was chief baker of the town, and he looked with a longing eye on these nice flat polished stones, for his oven wanted fresh bottoming. Whether he went to church or can out of church, it was all the same; he may passed the flat polished stones, but he thought of the bottom of his oven. In a bold hour he winked at parochial duty, removed the tablets, and at parochial duty, removed the tablets, and gratified his breast by placing them in that fiery place, which he thought sacred from all eyes but his own. But the stones, though nicely polished by the wear of years, yet re-tained some marks of their original destina-tion, and these cherished traces they very naturally imparted to the bottom of the baker's bread. [Late English paper.

> Alexandria, (D. C.) June 14. SHOCKING TO HUMANITY!

On Tuesday, the 4th inst. the body of a man was seen floating past this place, which, we since understand, was picked up near the Bluff, and shewed evident marks of the the Biur, and snewed evident marks of the most inhuman outrage. His legs were apparently cut off at the knees. His hands were also gone, and his head laid open. The body had no other clothing on than a red flannel shirt. We suppose it to he the body of some poor unfortunate sailor, who, through an indulgence, perhaps, of improper liabits, has come to an untimely death. We hope this example will have a tendency to caution others as to what company they keep, as we are inclined to think that this circumstance has been the result of inebriety and midnight revelry .- Herald.

From the Flowers of Modern Travels.

THE NUTMEG.

The nutmer tree is a beautiful vegetable. The stem, within smooth brown bark, rises perfectly straight. Its strong and numerous branches proceed regularly from it in an oblique direction upwards. They bear large oval leaves pendulous from them, some a foot in length. The upper and outer surface of the leaf is smooth, and of a deep agreeable green. The under and inner surface is marked with a strong sterve in the middle of the leaf, from the foot-salk to the point; and from this middle nerve others proceed obliquely towards the point and proceed obliquely towards the point and edges of the leaf; but what distinguishes most this innersurface, is its uniform bright most this innersurface, is its uniform bright brown colour without the least intermisture of green, and as if strewed all over with a fine Brown powder. The whole leaf is characterized by its fragrant odour, sufficiently denoting the fruit which the tree produces. This fruit, when fresh is about the size and figure of a common nectarine, its consists of an outward rind, between which and the inward shell, is found a reticulated membrace or divided skin, which, when dried, is called the mace. What is known by the name of nutmeg, is the kernel with in the shell; and is set in its original state.

FROM THE FRANKLIN 74 FROSI THE FRANKLIN 74
We have been favoured with the perusal of a letter from an officer on board the Franklin 74, dated at Valparaiso the 11th of February, & in the following paragraphs have endeavoured to give the writer's ideas on several subjects:

on several subjects:
In speaking of the Franklid, he says that she is crowded with viskors from morning to night, and excites uncomment admiration. The ship was in fine ordered and, after noticing the compliments paid from visitors; he observes, "I returned thanks for the compliments of friends for whom we felt a deep interest, and you cannot imagine the enthusiasm which animated their counfelt a deep interest, and you cannot imagine the enthusiasm which animated their countenances when I closed by observing that the North and South Americans were politically and geographically brothers and sisters, and that it gave us great pleasure that their visits afforded an opportunity of more closely uniting the bonds of friendship."

The write fact speaks in having direct that their visits afforded and opportunity of more closely uniting the bonds of friendship."

The writes next speaks of friendship."

The writes next speaks of having direct together with the other officers of the Franklin, on board the Brisish sloop of war Blossom. The compliment was reciprocated by the American officers. "They seem much disposed," says he, "to cultivate good fellowship and good feelings and they meet a fellowship and good feeling and they meet a fellowship and good feeling and they meet a corresponding disposition on our part.—
They speak without reserve on the propriety of avoiding every thing calculated to excite national feelings and prejudices; and I cite national feelings are produced. cite national feelings and prejudices; and I trust this good beginning may have a good end. In truth I never saw so much unrestrained cordialist between Englishmen and Americans, and must do them the justice te adu that they gentlemen in the full sense of the word."

The season of the year was unfavourable

The season of the year was unavourable to seeing Chili to advantage, as the luxuriance of the vegetable kingdom prevailed during the rainy season of winter; in a few months they expected to see the parched and apparently barren hills warrayed in all the normal and alory of Florals gavest cothe pomp and glory of Flora's gayest co-lours " The wheat crops have been cut

short by insects

Of the political state of the country the writer says little, but observes that the Chilians appear to be united in their detestatiliahs appear to be united in their detestation of the Spanish despotism, and ready to sacrifice the lives, in resisting their old masters unded," suys he, win this they are romantfelly patriotic, and brave to indiscretion; but their rulers, it is to be feared, are destitute of disinterested patriotism, and the populace too ignorant to perceive that a change from foreign despotism to domestic tyranny is not calculated to improve

that a change from foreign despotism to do-mestic tyranny is not calculated to improve their condition. Some difficulty it appears existed between Lord Cochrane and Gen San Martin. Reports infavourable to the latter, were in circulation and such epithets as "selfish," circulation and such epithets as "selbah," "cruel," "detestable," "willain," & "plun derer," was applied to him. The Chilians rejoiced that Cochrane was appropriating to his own purpose 500,000 dollars of the sum which St. Martin entrusted to his safe bearing and which constituted one half of keeping, and which constituted one half o the amount of which he had defrauded the Chilian government. 'N. Y. Gaz.

A LIVING TOAD

Was found in a stone taken from the Canal, at Lockport.—"The nearest distance from the exterior surface of the rock, to his place of confinement, was about six inches." It expired in a few moments after being exposed to the air.

FOREIGN VARIETIES.

Russian literature seems to make a rapid progress since the commencement of the century. From 1700 to 1800 only about 3000 works were printed in that empire, & special control when a control rest of Europe.

neck."

ANOTHER FAITHLESS SWAIN. ANOTHER FAITHLESS SWAIN.
A suit was brought at Haverbill, (N. H) on the 6th inst to recover damages for a breach of marriage promise, and the sum of \$384 dollars was taken from the pocket of the faithless lover and put into the lap of the disconsolate fair.
