TO SUBSCRIBERS

AFRICAN SETTLEMENT

The Agent, at Baltimore, of the African settlement at Cape Messara, appears to have received late accounts from that Colony, of a very interesting description. House had been built for the natives, who were employed in the cultivation of cotton, indigo, and other productions of the tropical climate.

CAPE MONTSERADO. Extract of a letter from Mr. J. Ashman, to the Rev. Mr. Hawley, of Washington City, dated 6th of the present month.

Rev. and Dear Sir: We are now 36 days from Baltimore, and have two days sail to make in order to reach St. Michael's one of the Western Islands, where, on account of the unexpected tediousness of the passage, it has been judged necessary to touch and recruit a few days, and procure fresh provisions and water for the remainder of the voyage.

SINGULAR. In Gibraltar, it is the opinion that yellow fever is propagated only in the night. For the last seven years the inhabitants of that place have encamped during the nights of what is called the 'dormer' season, at the Neutral Ground, in the suburbs of the city, and returned to their dwellings in the day.

YELLOW FEVER IN THE UPPER COUNTIES. We understand (says a paper published at Charlottesville, under date of 12th inst.) that a fever of a very malignant type, now prevails in the upper part of Fluvanna and some other counties on James River.
