CHAMPLAIN CANAL. Our village during the last week, says the Western Reporter, has presented a very interesting scene of business...

MILK. An experienced farmer recommends milk- ing three days, especially when cows are in good pasture...

SURGICAL. Dr. Robertson, of Nashville, lately operated on a negro man for the disease called trachoma...

The President of the United States has officially recognized Jose Leandro Palacios as Consul General of the Republic of Colombia...

THE DISCONTENTED SERVANTS. An old clock, that had been set for a year or two in a firm's kitchen...

'Lazy wire' exclaimed the dial, holding up its hands. 'Very good!' replied pendulum...

'For all that,' resumed the pendulum, 'it is very dark here; and, although there is a window, I dare not open it for an instant...

'The minute hand, being quick at figures, presently replied, eighty six thousand four hundred times.'

'Very good,' replied the dial; 'but recollect that though you may think of a million strokes in an instant, you are required to execute but one; and that, however long it may take to give you a swing, a moment will always be given you to swing in.'

MORAL.—'Take no thought for the morrow, for the morrow will take thought for the things of itself. Sufficient unto the day is the evil thereof.'

CLOSE QUARTERS. Forty thousand battle axes for the Gibraltar have been sent to Spain. 'It will not require a prophetic spirit to discover that the day of disaster, disaster and defeat, is rapidly approaching.'

The Quarterly Review is much blamed and reproached by many, even of those of the same party politics. Its acrimonious and ill-discreet articles...

POST OFFICES. The Emperor Trajan is recorded to have been the first to establish horses to convey letters, &c. but there is higher and earlier authority to which we will presently advert.

At a meeting of the Suffolk (Mass) bar, on the 13th inst. one of its members was expelled for dishonorable conduct towards his client.

Transferred to the N. Y. Advertiser. The bill for raising guerrillas, or free corps, in Spain, as passed by the Cortes at their session on the 25th of April at Seville:

Art. 1. The Generals in Chief of the Armies, and in case of communication with them being interrupted, the general Commandants of the districts or provinces, are authorized to form guerrilla parties, or free corps.

Art. 2. The commanders of provinces shall be inspectors of the guerrilla parties, which operate in their respective provinces, and shall take care to organize and to supply them with passports, without which they shall not be able to demand aid from the towns.

Art. 3. The supplies, the clothing, and the organization of the guerrilla parties into companies, battalions or squadrons, shall be under the commandants general of the district.

Art. 4. The rewards of the individuals who serve in the guerrilla parties, shall be bestowed by the government on the recommendation of the generals in chief.

Art. 5. In districts or provinces occupied by the enemy, all Spaniards are authorized to form guerrilla parties, their commanders being obliged to account to the general Commandants of the districts or provinces, and to subject themselves to their instructions and orders except in cases when the want of passports, or of their directions, shall prevent them from carrying on hostilities against the enemy, and they have no opportunity to receive them.

Art. 6. As the supplies afforded by the towns to guerrilla parties must be regulated by their force, which may be fluctuating, the inspectors may renew their passports when they think proper.

A bill was then read from the War Committee to authorize the raising of troops of foreigners, in the Peninsula Foreign Liberal Legion. It proposes to form a committee of three respectable foreigners in each army of operations, to give the foreign companies, battalions and squadrons the same footing and force as the Spanish army, and to place them under the command of foreign officers, who shall retain the rank they have respectively held in their own countries.

SIR PERKINS'S STEAM ENGINE. The following extract of a letter, from a gentleman of his name, appears in the Scientific American, and is highly interesting. It is published in the Boston Herald.

As many inquiries were made concerning Mr. Perkins's new steam engine, before I left Boston, without any satisfactory information being had, I will attempt to give you some account of it.

The cylinder in which the piston works is horizontal; the piston is two inches diameter, having a stroke of twelve inches, and is connected with the connecting rod by a short rod, which communicates with each other by means of a short strong pipe, so that the operating valve alternately closing and shutting, this communication is brought as near as possible to the cylinder.

JUNE. The month of June, that had and bloom forth its verdant crown, and had and bloom forth its verdant crown...

How sweet the merry bladders tunc, How blith the black-bird's lay, The wild-bird bells from ferny brake, The cool drives merry on the lake...

Spring weather has already passed, and we begin sensibly to feel the heat of summer. The energies of the body and mind begin to relax; our study grows oppressive, and we become averse to settled constant application of any kind.

From this, let us draw a moral. It is not always certain that the course we pursue with immediate views of profit, is the course most beneficial to our real interests, and actually subservient to the end we contemplate attaining.

What chances, what vicissitudes Hang on a single day? Yet foolish man extends his views To objects far away.

REGARDLESS OF THE PRESENT TIME. He dreams of years to come; And boasting of his strength and prime, His thoughts for ever roam.

CHRONOLOGY OF THE MONTH. June 14, 1775—Washington was appointed commander in chief of the American forces.

17, 1775—Battle of Breed's Hill. (commonly, but erroneously, called Bunker's.)

18, 1775—British army evacuated Philadelphia. Philadelphia declared war against England.

18, 1812—United States declared war against England.

HOW TO PRODUCE THE BEST FRUIT. Take a scion from a tree, the growth of the preceding year, of the choicest fruit to be found—cut this scion into pieces of two, three or four inches in length, dip the ends cut, in warm rosin, so as to prevent the sap from issuing out—plant the pieces in soil suitable for an orchard.

A PROFITABLE SHEEP. On the 2d inst. Mr. Aaron Sherwood, of Bennington, Vt., sheared from one sheep 16 pounds and 14 ounces of washed wool, of a good quality, and about 16 inches in length.

From an Exeter (Eng) paper. On Tuesday last, an intelligent French officer of fine appearance, late this town on his way to Spain; he was a short time since abruptly dismissed by the French government under suspicion of his not heartily approving the Spanish invasion.

From the Indiana Gazette. A WESTERN HERMIT. About 12 miles above the junction of Spoon and Illinois rivers, immediately on the bank of the former, there has been living, for three years past, a man who had entirely secluded himself from the world, and dwells in the midst of the wilderness alone, and upwards of 60 miles from the residence of any human being.

GREEN PEAS. On the 15th inst. for the first time this season, Green Peas were introduced into the Boston market. They sold at the rate of 13 dollars per bushel.
