**DECISIONS**

OF THE COURT OF APPEALS OF MARYLAND.

**Shaw & Gambrill,**  
ANNAPOLIS,  
Propose to Publish by Subscription,

**THE DECISIONS OF THE COURT OF APPEALS OF MARYLAND,**

To be Reported by Thomas Harris, Esquire, Clerk of the Court of Appeals, and Reverdy Johnson, Esquire, Attorney at Law.

These Decisions will form a continuation of the first volume of Reports already published by Messrs Harris and Johnson, which closes with the year 1805. It is proposed to publish the Decisions in a Series of Numbers, each to contain not less than one hundred and twenty five pages, and four numbers to constitute a volume. The number of each volume will contain a full and complete Index. This mode of publication, it is conceived, possesses advantages which give it a decided preference to that of publishing the Reports in bulky volumes. It ensures the earlier publication of the Reports, and as not more than four numbers will be published in a year, the expense will not be so sensibly felt.

TERMS.  
The price of each number of the Reports will be \$1.25, payable on delivery.  
Subscriptions to the above Work are received at Shaw & Gambrill's Store, the Maryland Gazette Office, and the respective Offices of the County Clerks of this state.

**Highly Important**

Hair Restorative and Preservative

**VEGETABLE CERATE.**

The important discovery of a vegetable substance, capable of restoring and preserving the Hair, was accidentally made by an individual who had neither the capacity nor the disposition to practise deception or fraud.

The fullest reliance may be placed on the efficacy and power of the Vegetable Cerate, not only in restoring and preventing the falling off the hair, but in producing the greatest lustre and liveliness of it; imaginable; and the public may rest assured that its effects will be clearly manifested in the course of a short time, by the renewal of vigorous growth of hair, and by effectually preventing its coming out or falling off. The Vegetable Cerate tends to resuscitate and excite the energies of the capillary vessels which constitute those organs that secrete the matter forming the hair; these, like many other organs of the animal body, which have been in the state of dormancy or disease, may be restored to their healthy action, and perform all those functions assigned by nature.

The proprietor being aware of the numerous specifics palmed on the public, and desirous that the present article may not suffer from false impressions, rests its merits on the effect it has produced on various persons who have used it, and all that is asked, as it relates to the verity of its effect, is a fair trial.

Elderly people, with bald heads, may rest assured, that by applying a few boxes of the above cerate, their hair will be restored with all its beauty and life.

To prevent imposition, the sale of the Vegetable Cerate will be confined to Dr James Hart, New-York, corner of Broadway and Chambers-streets, three doors from Washington, where it will be sold at \$1.75.

A liberal deduction will be made to country dealers.

The proprietor of the above valuable discovery, intends appointing agents through the United States for the sale of it, and also in Europe. A few boxes of the above valuable article is just arrived from New-York, and for sale by Dr. John Love, at his old established Drug and Patent Medicine Store, No. 22, Centre Market Space, Baltimore, who is appointed by the proprietor sole agent for the state of Maryland.

By virtue of the sole agency vested in me for the State of Maryland, I do hereby appoint the following agents for the sale of the valuable article above described:

**Medical Qualities of Oysters in Fevers and Consumption.**

Oysters are a mild, balsamic and cooling article of food, and are of the utmost benefit to those who are troubled with warm flushings of the face, and other feverish symptoms, usually felt in declines, and in nervous and irritable constitutions. It is quite possible, indeed, by making them a principal part of a meal, to prevent, in a great measure, the irritation and heat which produces the hacking and distressing cough in the more advanced stage of consumption. Oysters, indeed, and other mild nourishing food, will often altogether prevent consumption in those who are disposed to it from hereditary causes.
