**MODE OF DRAWING.**  
 The numbers will be put into a wheel as usual, and in the other wheel will be put the prizes above the denomination of Four Dollars, and the drawing to progress in the usual manner. The 20,000 prizes of \$4 each will be awarded to the odd or even numbers in the Lottery. (As the case may be.) dependent on the drawing of the capital prize of \$30,000, that is to say, if the 50,000 dollar prize should come out to an odd number then every odd number in the scheme will be entitled to a four dollar prize, if the 30,000 dollar prize should come out to an even number, then all the even numbers in the scheme will be entitled to a 4 dollar prize.  
 The odd numbers are those ending with 1, 3, 5, 7, or 9.  
 The even numbers are those ending with 2, 4, 6, 8, or 0.  
 This mode of drawing not only enables the Commissioners to complete the whole Lottery in one drawing, but has the great advantage of distributing the small prizes regularly to every alternate number in the scheme, so that the holder of two tickets or two shares of tickets (one odd and one even number) will be certain of obtaining at least one prize, and in the same ratio for any greater quantity.  
 A ticket drawing a superior prize in this scheme is not restricted from drawing an inferior one also—many tickets therefore, will necessarily contain two prizes each.
